

### IHS Mono Stressing Jacks

Brand..... IHS

#### Description

- Designed for initialing in the prestressing industry or rock/cable bolting in the mining industry.
- Very light weight, able to be used overhead.
- Can be fitted with flat or solid noses.
- Suits 5, 7, 9.6, 12.7 & 15.2 strand.
- Vertical port orientation

### IHS Multi Strand Jacks

Brand..... IHS

#### Description

Stressing with multi strand jacks means that all strands in a cable bundle can be stressed simultaneously. The advantage of this method is the fast and accurate stressing operation of the cables in one step.

Our multi-strand jacks come with a variety of options to suit your specific requirements.

They have capacities of 110T to 1300T and strokes from 100mm to 300mm.

#### Features

- 690 bar operating pressure - high tonnage at low weight
- Pressure relief valve
- Hard chromed rod and inner
- Bronzed piston and gland
- Lifting bar
- Anti-rotation
- Feet

#### Optional accessories

- Nose, internal strand guide, back block and shaker plate all custom drilled to your hole pattern
- Hydraulic nose
- Multi-strand reusable chrome plated wedges w/screws
- Nose extension/adaptor
- NATA Calibrated gauge

## Mechanical & Hydraulic Bolting Tools

Brand.....ENERPAC

### Description

Enerpac's comprehensive range of mechanical and hydraulic bolting equipment provides precise & effective force to make your work more productive, safer, and easier to perform. From joint assembly, controlled tightening, torque wrench pumps to joint separation, Enerpac's bolting equipment, tools & accessories offer the solution best-suited to the project, available from one source.

Pls click the links as below to refer Model , Description , Advantages, Specification :-

## Hydraulic Pumps and Valves

Brand.....ENERPAC

### Description

Enerpac combines the widest selection of high pressure hydraulic pumps available with reliability, durability and built-in safety to make it easy to find the right pump for any application requiring applied force. Available in over 1,000 different hydraulic power unit configurations, including manual pumps, battery driven pumps, gas powered pumps, air driven pumps, and electric driven pumps, perfectly matched to Enerpac's family of tools and accessories. Our high pressure hydraulic pumps and valves offer a lifetime warranty, and are designed to make you more productive and efficient in the work you perform.

### Description

#### System Components

Enerpac's System Components are the perfect complement to Enerpac's cylinders, tools and pumps. The most extensive range of hydraulic system components, available and supported worldwide, completes the Enerpac hydraulic system to provide dependable and efficient performance. Every one of these components - gauges, fittings, manifolds, hoses, couplers and hydraulic oil - is manufactured to the highest standards, in keeping with Enerpac's focus on reliability and commitment to safety.

# Hydraulic Presses

Brand.....ENERPAC

### Description

Enerpac features an extensive line of strong, durable hydraulic presses designed to provide long-lasting, precise and safe application of effective force in your workshop. Enerpac's maintenance presses are available in a wide range of sizes and capacities, from 5 – 200 tons, or you can 'build your own' to unique specifications. Enerpac's press frames are welded for strength - not bolted together - and feature corrosion-resistance surfaces. Our exclusive Roll-Frame design provides tremendous flexibility and ease of use.

Roll-Frame Presses**

**Hydraulic Press Accessories  
for VLP, XLP, BPR-series**

**A-Series, C-Clamp  
and Arbor Presses**

**TM, LH-Series, Press Tension  
Meter and Load Cells**

**Hydraulic Presses**

## Mechanical & Hydraulic Pullers

Brand.....ENERPAC

### Description

Enerpac offers a complete line of mechanical and hydraulic pullers with the widest range of sizes, capacities and styles. Whether your application requires mechanical, hydraulic or the patented Posi Lock® system, Enerpac can satisfy your requirements. Made of high strength steel alloys, you can depend on Enerpac pullers to provide years of trouble-free operation, even in the harshest environments.

## TTZ model - Slim-line high performance cassette tool

Brand.....ENERPAC

### Description

Multi-position hose couplers: For no hose interference on all jobs

Simple connect hex links: For quick and easy hex size changes

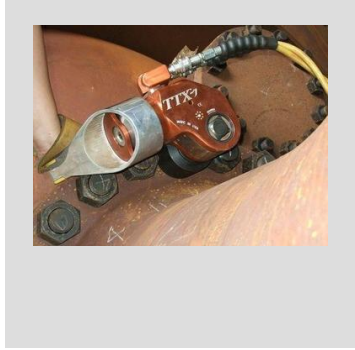

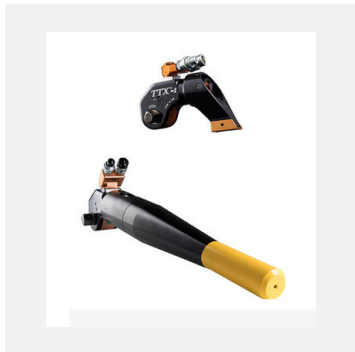

Efficient mechanical design: For simple and inexpensive repairs of internals

Highest quality internal metals: For durability and long life

Manufactured & Assembled in the USA Highest levels of material and quality control

Slim design for universal fit Fits anywhere a square drive tool will not

## TTX Square Drive Torque Tool

Brand.....ENERPAC

### Description

180/360 degree multi-position hose couplers: For no hose interference on all jobs

Efficient mechanical design with 3 moving parts: For simple and inexpensive repairs of internals

Highest quality aluminum and steel alloys: For durability and longevity

Manufactured & assembled in the U.S.A.: Highest level of material and quality control

## Tri-Glide Systems

Brand.....ENERPAC

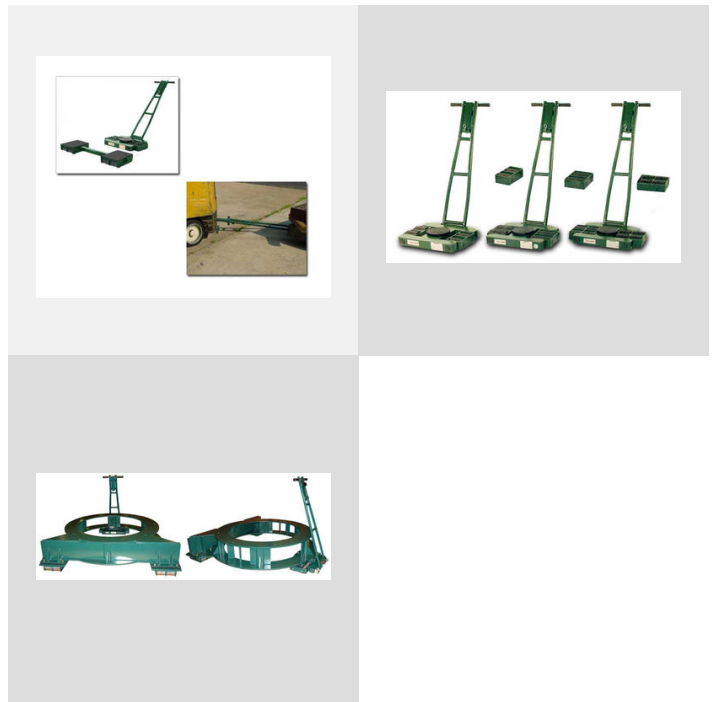

### Description

These low profile, 3-Point Load Moving Systems are perfect for moving over finished floors. They are currently available in load moving capacities of 6, 12, and 18 tons with additional load capacities coming soon. Choose from Nylon, Polyurethane, or Steel rolls to suit your moving requirements.

Hilman Rollers' Tri-Glide three-point moving system is designed for moving heavy loads over specially coated floors. It is comprised of a front steering unit and two rear adjustable units. Additional modules can be added to further stabilize large, bulky loads. Hilman Rollers' Tri-Glide was developed in response to a growing demand for floor protection when moving heavy loads over smooth, painted, finished, or sealed floors. Currently available in six, twelve, and eighteen-ton capacities, the Tri-Glide is another safe, efficient, reliable product from the makers of Hilman Rollers.

### Individual Nyton Series

**Description**

Nyton Series Hilman Rollers are ideal for moving heavy machinery and equipment on delicate floor surfaces. The ultimate goal of the Nyton Series is floor protection. These rollers work very well on epoxy coated and sealed concrete floors as well as some types of tile floors. Nyton Series are all offered with padded tops to accommodate slightly uneven floor surfaces.
