

PVC U Shape Clip

| | |
|---------------|---------|
| Color..... | Black |
| Polymer..... | Anti-UV |
| Material..... | Plastic |
| Weight..... | 15g/pcs |

Description

- 1.Used to attach greenhouse film to greenhouse frame pipe
- 2.Smooth finish and very tenacious
- 3.Anti-rust and hard to crack
4. Works well under both high temperature and low temperature

Nexus Barrier Mesh

| | |
|--------------------------|------------------------------------|
| Rolls Size..... | 1m x 50m |
| Color..... | Brilliant Orange |
| Mesh Dimension..... | 140 x 25mm |
| Polymer..... | 100% Polypropylene U.V. Stabilised |
| Weight..... | 4.5kg |
| Breaking Elongation..... | >100% |
| Mesh Thickness..... | 0.75mm |

Description

Nexus Barrier Mesh is an extruded polypropylene plastic mesh ideal for cordoning off building sites, construction sites, sporting event areas and for general crowd and pedestrian control. Barrier mesh is UV-stabilized and a bright, high-visibility orange color for maximum warning.

Applications

- construction sites / building sites
- chicken runs
- events
- supporting home insulation
- windbreaks - dust
- sport lanes
- poultry netting

Farm Nail

Packing.....Per Carton
 Per Carton.....1,000 pcs
 Material.....Plastic
 Polymer.....Anti UV

Description

It can be used as a fastener to Weed Control Mat:

- 1.Can be used with any shade fabric
- 2.UV stabilized for lasting durability
- 3.High impact plastic components provide long life

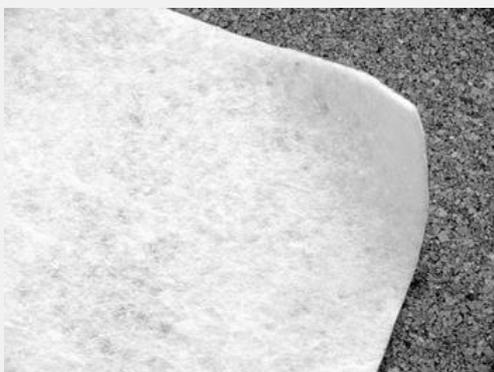

[4.It](#) can be used as a fastener to net

Weather Resistant Film

Rolls Size.....4m x 50m x 0.12mm
 Rolls Size.....7.32m x 34m x 0.15mm
 Rolls Size.....7.32m x 49m x 0.15mm

Description

Weather resistant film with UV stabilization for 3 years in 120-140 KLY/ year climate condition with thickness of 150 Microns. The Vinyl Acetate content for this film is 2% with maximum transparency over 83%. Weather resistant film possess greater strength, flexibility and resistance which ensure a long and more efficient useful life. Furthermore, it can also absorb or reflect the infrared radiation that making it become essential for the growth of plants or crops in the greenhouse.

Nonwoven Geotextile

Description

Nonwoven geotextile is made to achieve a higher quality standard material and has ISO 9001:2008 accreditation.

The geotextile is made using needle punched technology and have high resistance on heat and light. It is proven to exhibit long term resistance to all substances occurring naturally in soil, water and microorganism.

Weed Control Mat - White

Color.....White
 Polymer.....H.D. Polyethylene

Description

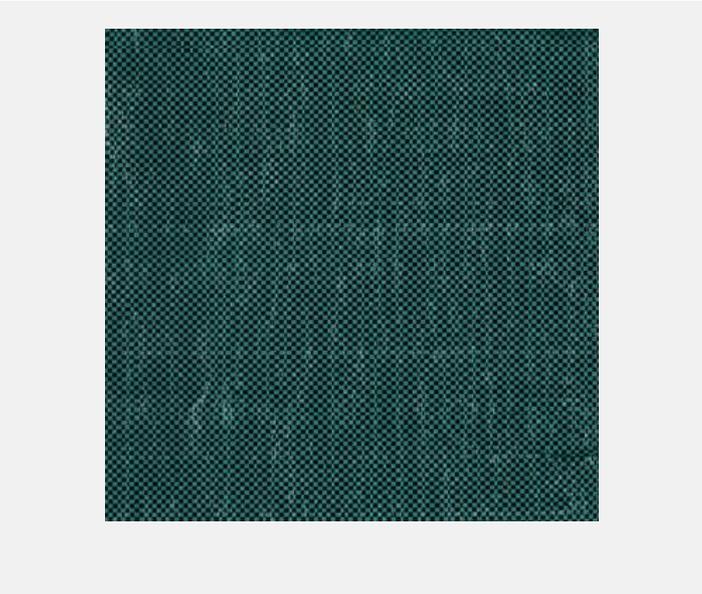

Weed Control Mat is made of high quality Polyethylene yarn with Ultra Violet stabilised properties. It prevents any sunlight penetration. As such, it inhibits any weed growth. Being woven and hence porous, water and nutrients can pass through.

Advantage

Weed Control Mat is an ideal material for all area where weed control is absolutely necessary. It is a cost effective and environmental friendly method compare to conventional way of using herbicide sprays. This products is suitable for use in all crops (especially for the newly transplanted seedlings of plantations and orchards) as well as in plant nursery, green house flooring and etc.

Method Of Application

Weed Control Mat on the desired area and hold in place with pegs or cover the edges with soil. In areas where extremely vigorous weeds are present, it is advisable to spray a round of herbicide first.

Weed Control Mat - Green

Color.....Green & Black
Polymer.....H.D. Polyethylene

Description

Weed Control Mat is made of high quality Polyethylene yarn with Ultra Violet stabilised properties. It prevents any sunlight penetration. As such, it inhibits any weed growth. Being woven and hence porous, water and nutrients can pass through.

Advantage

Weed Control Mat is an ideal material for all area where weed control is absolutely necessary. It is a cost effective and environmental friendly method compare to conventional way of using herbicide sprays. This products is suitable for use in all crops (especially for the newly transplanted seedlings of plantations and orchards) as well as in plant nursery, green house flooring and etc.

Method Of Application

Weed Control Mat on the desired area and hold in place with pegs or cover the edges with soil. In areas where extremely vigorous weeds are present, it is advisable to spray a round of herbicide first.

Ferti-Mix

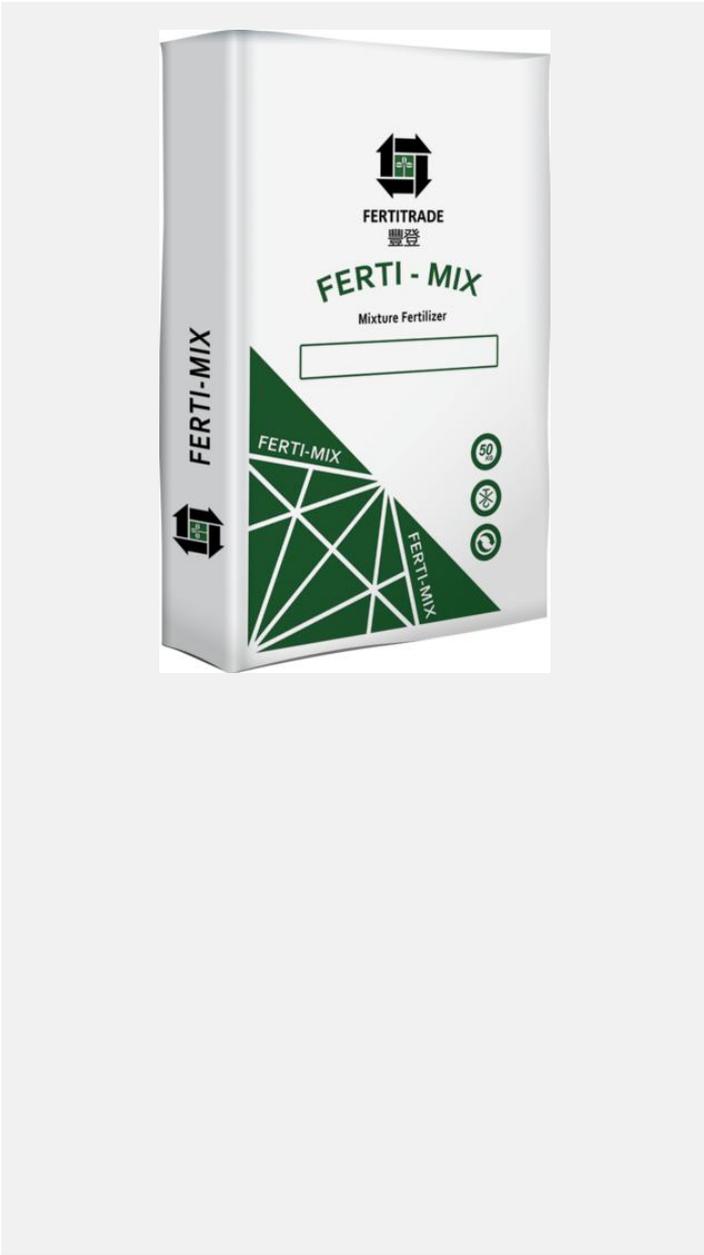

Description

Premium mixture fertilizer comes in various formulations according to customer needs.

Key Benefits:

1. Quality assurance premium grade mixture.
2. 100% nutrient calculation based on SIRIM specification.
3. High quality raw materials.

To know more info or nearest dealer store, kindly call us at +60(3) 7666 8899 or email to us at enq@fertiltrade.com.my

Plastic Cord

Rolls Size.....1.5mm x 1000m
 Color.....Black
 Tensile Strength.....650(N)
 Packing.....5 coils per box

Description

Plastic Cord is also called as Excel Cord. Twice the strength as conventional iron wire. Small degree of extensibility. No loose by change of stretch and temperature. One-sixth weight of wire. Resistant to chemicals and rust.

PE Net 380

Rolls Size.....Customized
 Color.....Dark Green
 Mesh Aperture.....1" x 1"
 Polymer.....Polyethylene

Description

Fishing nets are devices made from fibers woven in a grid-like structure. Some fishing nets are also called fish traps. Fishing nets are usually meshes formed by knotting a relatively thin thread. Early nets were woven from grasses, flaxes and other fibrous plant material. Later cotton was used. Modern nets are usually made of Polyethylene, the purpose of the materials can be reflect from sunlight, tougher than nylon and more durable.

Hexamesh

Rolls Size.....31m x 31m
Color.....White
Mesh Aperture11mm x 11mm
Weight.....38.6 kg / rolls
Polymer.....Polyethylene

Description

Applications

- to avoid birds / bats attack fruit farm
- to cover fruits prevent from hot sunlight
- to protect fruits

Agrinet SN 080

Rolls Size.....2m x 100m
Color.....Black
Shade.....80%
Polymer.....H.D. Polyethylene

Description

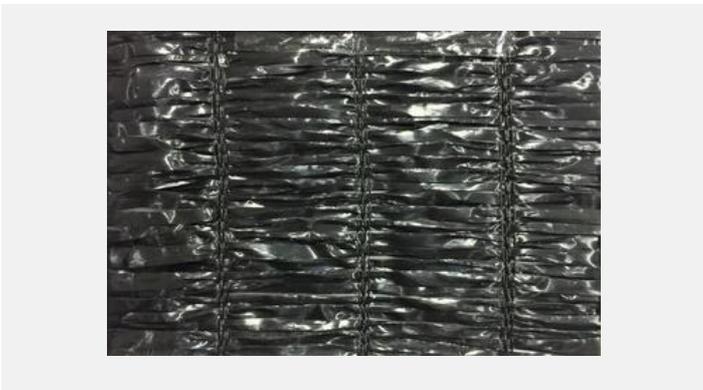

Agrinet SN070 also called as orchid net. Orchid net could be used to cover your shade house skeleton or greenhouse glazing, to cool it down for your plants. Hobbyists, growers, nurseries, gardeners and farmers should protect their young plants from direct sunlight.

Features

- light weight & easy to install
- UV protection
- chemical resistant
- cost effective
- cooling
- moisturizing
- drop indoor temperature

Used

- Greenhouse Covers
- Shade Structures
- Livestock Shading
- Temporary Fencing
- Windbreaks
- Bird Netting
- Swimming Pool Covers

- Truck Tarps
- Tennis Courts and Ball Diamonds

Agrinet SN 060

Rolls Size.....2m x 100m
 Color.....Black
 Shade.....60%
 Polymer.....H.D. Polyethylene

Description

Agrinet SN060 also called as orchid net. Orchid net could be used to cover your shade house skeleton or greenhouse glazing, to cool it down for your plants. Hobbyists, growers, nurseries, gardeners and farmers should protect their young plants from direct sunlight.

Features

- light weight & easy to install
- UV protection
- chemical resistant
- cost effective
- cooling
- reduce spread of pets

Used

- Greenhouse Covers
- Shade Structures
- Livestock Shading
- Temporary Fencing
- Windbreaks
- Bird Netting
- Swimming Pool Cover
- Truck Tarps
- Tennis Courts and Ball Diamonds

Agrinet VN 160

Rolls Size.....0.9m x 24m
 Color.....Blue
 Mesh Size.....16 mesh
 Polymer.....H.D. Polyethylene

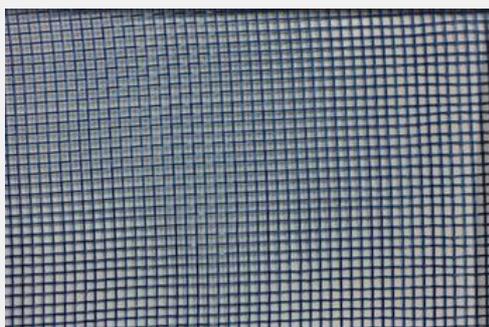

Description

Insect Netting has been designed and tested to offer the highest quality insect netting available for Cabbage Root Fly, Carrot Root Fly, Green Fly and etc. It is constructed from virgin polyethylene and has a UV life expectancy of over 5 years. Blocks penetration of insects and protects against pests. To be used in protection of flowers, plants and vegetables in green houses or nurseries.

The anti insect net is made of monofilaments that are manufactured with special UV-resistant materials, giving the net durability and longevity.

Advantage

- lightweight and easy to install
- 100% mesh density and shade percentage
- original weaving techniques and material
- reinforced side edges
- extra tensile strength
- high stabilized to be resistant to UV rays

Pond Liner

Description

1. Light weight(300gm / sqm)
2. Does not contain any chloride, softening agents or heavy metals
3. High tears strength and high puncture resistance
4. UV and thermal stability
5. Efficient installation
6. Harmless for environment,shrimp and human health
7. Doesn't lead to "disastrous" tear propagation and can be repair easily
8. Durable, no significant change in properties

Fishery

Description

For Fish Cage Net, Pond Partition Net, Fish or Prawn Rearing, Fish Trap, Turtle Hatchery, etc.

Fish Cage Net

Pond Partition Net

Fish Rearing

Fish Trap

Turtle Hatchery

Cliff Protection

Road Construction

Gabion

Slope Protection

Erosion Control

River Embankment

Civil Engineering

Description

For Cliff Protection, Road Construction, Gabion, Slope Protection, Erosion Control, River Embankment, etc.

Domestic

Description

For Perimeter Fencing, Pool Partition Net, House Fencing, Court Fencing, Futsal, etc.

Perimeter Fencing

Pool Partition Net

House Fencing

Court Fencing

Futsal

Industrial

Description

For Roof Insulation Support Net, Construction Safety Net, Golf Driving Range Net, Hanging Net, Pest Control Net, Cargo & Lorry Net, etc.

Royal Terra 11/5.5/22 +6%S +8%CaO

Description

Imported nitrophosphate fertilizer from Taiwan produced by reacting phosphate powder rock with nitric acid to convert excess calcium into valuable calcium nitrate instead of gypsum. At the same time, nitrogen, phosphorus, potassium, magnesium and others are added to provide full range of nutrients to the plant. Provides additional advantage by acting as soil conditioner while supplying nutrients at balance ratio.

Key Benefits:

1. High K formulation to enhance crop growth
2. Adequate sulphur contents promote crop growth and earlier maturity
3. Immediate availability of nitrate-nitrogen and water soluble phosphate.
4. Availability of both fast action nitrate-nitrogen and slow action.
5. Fast absorbibility.
6. Addition of CaO for soil amendment and also to increase plant resistance against drought period, pest and diseases.
7. Addition of soil conditioner to enhance soil structure and fertility.
8. Minimal soil acidification.
10. Ideal NK ratio approx 1 : 2 to enhance oil palm fruit bunches weight.
11. Ideal formulation for banana planting.

To know more info or nearest dealer store, kindly call us at +60(3) 7666 8899 or email to us at eng@fertitrade.com.my

Agriculture

Description

For Pergola Net, Orchid Shade, Plant Guard, Shading Net, Weed Control Mat, Creeper Support, Fruit Protection Net, Fruit Farm House, Greenhouse Farming, Hydroponic House, etc.

Royal Terra 15/15/15/4MgO+8.5%CaO

Description

Imported nitrophosphate fertilizer from Taiwan produced by reacting phosphate powder rock with nitric acid to convert excess calcium into valuable calcium nitrate instead of gypsum. At the same time, nitrogen, phosphorus, potassium, magnesium and others are added to provide full range of nutrients to the plant. Provides additional advantage by acting as soil conditioner while supplying nutrients at balance ratio.

Key Benefits:

1. Balance ratio of N, P and K.
2. Immediate availability of nitrate-nitrogen and water soluble phosphate.
3. Availability of both fast action nitrate-nitrogen and slow action.
4. Suitable for entire growth stage.
5. Fast absorptibility.
6. Addition of MgO to increase chlorophyll level, hence improve photosynthesis.
7. Addition of CaO for soil amendment and also to increase plant resistance against drought period, pest and diseases.
8. Addition of soil conditioner to enhance soil structure and fertility.
9. Minimal soil acidification.
10. Ideal long term fertilizer type for leafy vegetables.

To know more info or nearest dealer store, kindly call us at +60(3) 7666 8899 or email to us at eng@fertitrade.com.my

Agrinet Brochure

Description

Multi-purpose functions of Agrinet

CN Net HM2039

Rolls Size.....2m x 25m
Color..... Black
Mesh Aperture.....8mm x 8mm
Mesh Thickness.....2.0mm
Polymer.....H.D. Polyethylene

Description

Nexus extruded Polymer Grids and Mesh are made of high density polyethylene (H.D.P.E.), a material that meet the stringent tensile properties required in Civil Engineering works such

as :

- Road Construction
- Railway Construction
- River Bank Protection
- Erosion Control
- Slope Protection and Reinforcement
- Drainage in Landfills & Retaining Walls

Ferti-Grow Red 10/6/24/2MgO+TE

Description

Premium granular fertilizer with high K formulation suitable for matured oil palms.

Key Benefits:

1. Quality assurance premium grade granular blend.
2. 100% nutrient calculation based on SIRIM specification.
3. A complete nutrient with high K formulation to promote higher yield and quality and higher P to stimulate root development and enhance flowering rate.

To know more info or nearest dealer store, kindly call us at +60(3) 7666 8899 or email to us at enq@ferti-trade.com.my

Ferti-Grow Purple 10/3/27/2MgO+TE

Description

Premium granular fertilizer with high K formulation suitable for matured oil palms.

Key Benefits:

1. Quality assurance premium grade granular blend.
2. 100% nutrient calculation based on SIRIM specification.
3. A complete nutrient with higher K formulation to promote higher yield and correct NK imbalance symptom.

To know more info or nearest dealer store, kindly call us at +60(3) 7666 8899 or email to us at eng@fertitrade.com.my

Ferti-Grow Green 10/6/20/2MgO+TE

Description

Premium granular fertilizer with high K formulation suitable for matured oil palms.

Key Benefits:

1. Quality assurance premium grade granular blend.
2. 100% nutrient calculation based on SIRIM specification.
3. Ideal NK ratio of approx. 1 : 2 to increase fruit weight.
4. Provision of balanced nutrients to oil palms.

To know more info or nearest dealer store, kindly call us at +60(3) 7666 8899 or email to us at eng@fertitrade.com.my

Golden Fruit Red 12/6/22/3+TE

Description

Premium granular fertilizer with high K formulation suitable for matured oil palm.

Key Benefits:

1. Quality assurance premium grade granular blend.
2. 100% nutrient calculation based on SIRIM specification.
3. Ideal NK ratio of approx. 1 : 2 to increase fruit weight.
4. Provision of balanced nutrients to oil palms.

To know more info or nearest dealer store, kindly call us at +60(3) 7666 8899 or email to us at enq@fertitrade.com.my

Golden Fruit Orange 10/5/23/3MgO+TE

Description

Premium granular fertilizer with high K formulation suitable for matured oil palm.

Key Benefits:

1. Quality assurance premium grade granular blend.
2. 100% nutrient calculation based on SIRIM specification.
3. Ideal NK ratio of approx. 1 : 2 to increase fruit weight.
4. Provision of balanced nutrients to oil palms.

To know more info or nearest dealer store, kindly call us at +60(3) 7666 8899 or email to us at enq@fertitrade.com.my

Golden Fruit Green 10/5/20/3MgO+TE

Description

Premium granular fertilizer with high K formulation suitable for matured oil palms.

Key Benefits:

1. Quality assurance premium grade granular blend.
2. 100% nutrient calculation based on SIRIM specification.
3. Ideal NK ratio of approx. 1 : 2 to increase fruit weight.
4. Provision of balanced nutrients to oil palms.

To know more info or nearest dealer store, kindly call us at +60(3) 7666 8899 or email to us at enq@fertitrade.com.my

Super Ferti Gold 14/14/23+TE

Description

Ammonium Nitrate based imported NPK Compound from EuroChem JSC, Russia which contains two types of nitrogen source, ie. Ammonium (NH₄) and nitrate (NO₃) with minimum 75% water soluble P₂O₅. It is a high quality granular form, free flowing and non-powdery.

Key Benefits:

1. Homogenous, free flowing and non-powdery granular.
2. Suitable for primary and sowing fertilization due to high N and P ratio.
3. High total nutrient content (51% of total nutrient) to provide good growth and high production.)
4. Nitrate is readily available for plant uptake in which ammonium will be converted to nitrate by soil microbes to sustain the nitrogen nutrient for the crops.
5. High water soluble P₂O₅ (minimum 75%) provides fast reaction and suitable to be incorporated into any fertilizer program.
6. Availability of trace elements (TE) ie. Zinc, Manganese, Cobalt and Copper to give better yield and improve fruit quality.
7. Suitable for oil palm and other fruit crops such as banana, maize and tuber.

Nutrient Contents:

Total Nitrogen (N): 14% (Ammonium: 8%; Nitrate: 6%)

Phosphate (P₂O₅): 14% (Water soluble Phosphate: 11%)

Potassium Oxide (K₂O): 23%

Trace Element (TE): Zn, Mn, Co & Cu

To know more info or nearest dealer store, kindly call us at +60(3) 7666 8899 or email to us at enq@fertiltrade.com.my

Super Ferti Red 13/5/22/4MgO+TE

Description

Ammonium Nitrate based imported NPK Compound from EuroChem JSC, Russia which contains two types of nitrogen source, ie. Ammonium (NH₄) and nitrate (NO₃) with minimum 75% water soluble P₂O₅. It is a high quality granular form, free flowing and non-powdery.

Key Benefits:

1. Formulation for matured oil palms.
2. Ideal NK ratio of approx. 1:2 and its high total nutrient content (44% of total nutrient) to provide good growth and production.

3. A complete nutrient with high K formulation to promote higher yield and quality fruits especially in mature oil palms and cash crops ie. papaya, banana, corn and others.

4. Nitrate is readily available for plant uptake in which ammonium will be converted to nitrate by soil microbes to sustain the nitrogen nutrient for the crops.

5. High water soluble P₂O₅ (minimum 75%) provides fast reaction and suitable to be incorporated into any fertilizer program.

6. Sufficient Mg to enhance yield production and oil synthesis.

7. Essential trace elements for better crop growth and development.

Nutrient Contents:

Total Nitrogen (N): 13% (Ammonium: 7%; Nitrate: 6%)

Phosphate (P₂O₅): 5% (Water soluble Phosphate: 3.9%)

Potassium Oxide (K₂O): 22%

Magnesium Oxide (MgO): 4%

Trace Element (TE): Zn, Mn, Co & Cu

To know more info or nearest dealer store, kindly call us at +60(3) 7666 8899 or email to us at eng@fertitrade.com.my

Super Ferti Blue 12/12/20/3MgO+TE

Description

Ammonium Nitrate based imported NPK Compound from EuroChem JSC, Russia which contains two types of nitrogen source, ie. Ammonium (NH₄) and nitrate (NO₃) with minimum 75% water soluble P₂O₅. It is a high quality granular form, free flowing and non-powdery.

Key Benefits:

1. Formulation for immature oil palms (3rd year palm onwards).
2. High N, P and K to enhance growth and prepare for maturity.
3. Sufficient P & K for inducing flowering and enhancing fruits formation.
4. Nitrate is readily available for plant uptake in which ammonium will be converted to nitrate by soil microbes to sustain the nitrogen nutrient for the crops.
5. High water soluble P₂O₅ (minimum 75%) provides fast reaction and suitable to be incorporated into any fertilizer program.
6. Availability of magnesium, sulphur and trace elements (TE) ie. Zinc, Manganese, Cobalt and Copper to give better yield and improve fruit quality.

Nutrient Contents:

Total Nitrogen (N): 12% (Ammonium: 7%; Nitrate: 5%)

Phosphate (P₂O₅): 12% (Water soluble Phosphate: 9.5%)

Potassium Oxide (K₂O): 20%

Magnesium Oxide (MgO): 3%

Trace Element (TE): Zn, Mn, Co & Cu

To know more info or nearest dealer store, kindly call us at +60(3) 7666 8899 or email to us at enq@fertitrade.com.my

Ag Ammonium Molybdate

Description

A soluble powder formulation of ammonium Molybdate containing water soluble Mo of 54%w/w.

Key Benefits:

1. Molybdate involved in enzymes systems relating to nitrogen fixation by bacteria growing symbiotically with legumes.
2. Nitrogen metabolism, protein synthesis and sulphur metabolism are also affected by Molybdate.
3. Molybdate has a significant effect on pollen formation, hence fruit and grain formation are affected in Mo deficient crop.

To know more info or nearest dealer store, kindly call us at +60(3) 7666 8899 or email to us at enq@fertitrade.com.my

Ag Leader Ca 1L/4L

Description

Ag Leader Ca is a foliar fertiliser specially formulated for fruiting crops. It can optimise the absorption and uptake of calcium, magnesium and boron in the crop.

Key Benefits:

Ag Leader Ca is able to enhance the fruit quality due to:

1. Suitable and efficient Ca + B formulation to control bitterpit, blossom end rot and fruit cracking.
2. A water soluble Ca formulation that consists of:
 - High calcium level to increase the strength of exocarp, reduce fruit cracking and risk of disease during storage;
 - Balanced magnesium level;
 - Nitrate as nitrogen source thus easier absorption by crop.

To know more info or nearest dealer store, kindly call us at +60(3) 7666 8899 or email to us at enq@fertitrade.com.my

Ag Foliar 10-8-6 1L/4L

Description

Ag Foliar 10-8-6 is a foliar fertiliser specially formulated to stimulate growth of the crop. It consists of macronutrients, micronutrients and amino acid, which are vital to the crop growth and development.

Key Benefits:

1. Increase chlorophyll level of the leaves thus better photosynthesis;
2. Better root growth and development;
3. Lusher crop;
3. Crop growth stimulation;
4. Earlier harvesting.

To know more info or nearest dealer store, kindly call us at +60(3) 7666 8899 or email to us at eng@ferti-trade.com.my

Agro Activa Red 12/6/22/3

Description

Agro Activa is a premium grade NPK Compound Fertilizer, with its production line utilizing advanced technologies and undergoing a stringent quality control process.

Suitable for matured oil palm and is a proven formulation. The high N and K content will provide for good growth and production. Sufficient P and Mg content will help spur the growth of oil palm.

Key product features:

One-liquid-phase during production

- Urea is melted and sprayed onto a pre-mixed of SUPERFINE Rock Phosphate / Soluble Phosphate, MOP and Magnesium Sulphate in the granulator. Steam is added for better granulation.
- Uniform and consistent nutrient content.

Advanced drying and cooling system

- Drying at 100 -110°C
- High-tech drying drum. COMPLETE and UNIFORM DRYING of granules.
- Advanced dehumidifier system to cure the finished products.

High Nutrient Formulations

- High nutrient content to ensure high level of efficiency and productivity.
- Reduce application rates.
- Savings in labour, storage and transportation costs.
- Balanced nutrients for better yield.

SUPERFINE Rock Phosphate and Soluble Phosphate

- Uniform binding of all granules.
- Improved solubility of phosphate.
- Improved uptake of phosphate.

To know more info or nearest dealer store, kindly call us at +60(3) 7666

Agro Activa Brown 12/6/28+B

Description

Agro Activa is a premium grade NPK Compound Fertilizer, with its production line utilizing advanced technologies and undergoing a stringent quality control process.

Specially formulated for matured oil palms. Due to the high K content, the productivity of oil palm will be enhanced and with the synergistic effect of N and K (favourable ratio between N and K), better growth is expected. In addition, the inclusion of water soluble borate will further enhance the growth and flowering stages of the palm.

Key product features:

One-liquid-phase during production

- Urea is melted and sprayed onto a pre-mixed of SUPERFINE Rock Phosphate / Soluble Phosphate, MOP and Magnesium Sulphate in the granulator. Steam is added for better granulation.
- Uniform and consistent nutrient content.

Advanced drying and cooling system

- Drying at 100 -110°C
High-tech drying drum. COMPLETE and UNIFORM DRYING of granules.
- Advanced dehumidifier system to cure the finished products.

High Nutrient Formulations

- High nutrient content to ensure high level of efficiency and productivity.
- Reduce application rates.
- Savings in labour, storage and transportation costs.
- Balanced nutrients for better yield.

SUPERFINE Rock Phosphate and Soluble Phosphate

- Uniform binding of all granules.
- Improved solubility of phosphate.
- Improved uptake of phosphate.

To know more info or nearest dealer store, kindly call us at +60(3) 7666 8899 or email to us at enq@fertitrade.com.my

Agro Activa Yellow 15/15/6/4

Description

Agro Activa is a premium grade NPK Compound Fertilizer, with its production line utilizing advanced technologies and undergoing a stringent quality control process.

Suitable mainly for immature oil palm. This is due to the high N and P content to boost growth in the first years in the field. It is well-balanced in terms of nutrient and is a proven formulation in the oil palm industry.

Key product features:

One-liquid-phase during production

- Urea is melted and sprayed onto a pre-mixed of SUPERFINE Rock Phosphate / Soluble Phosphate, MOP and Magnesium Sulphate in the granulator. Steam is added for better granulation.
- Uniform and consistent nutrient content.

Advanced drying and cooling system

- Drying at 100 -110°C
- High-tech drying drum. COMPLETE and UNIFORM DRYING of granules.
- Advanced dehumidifier system to cure the finished products.

High Nutrient Formulations

- High nutrient content to ensure high level of efficiency and productivity.
- Reduce application rates.
- Savings in labour, storage and transportation costs.
- Balanced nutrients for better yield.

SUPERFINE Rock Phosphate and Soluble Phosphate

- Uniform binding of all granules.
- Improved solubility of phosphate.
- Improved uptake of phosphate.

To know more info or nearest dealer store, kindly call us at +60(3) 7666 8899 or email to us at enq@fertiade.com.my

Agro Activa Blue 12/12/17/2+B

Description

Agro Activa is a premium grade NPK Compound Fertilizer, with its production line utilizing advanced technologies and undergoing a stringent quality control process.

Suitable for immature oil palm especially in the 2nd year after planting. The high N, P and K content is to ensure continuing good growth while preparing the palms for the mature stage of their growth. The inclusion of water soluble borate will further enhance the growth and flowering stages of the palm.

Key product features:

One-liquid-phase during production

- Urea is melted and sprayed onto a pre-mixed of SUPERFINE Rock Phosphate / Soluble Phosphate, MOP and Magnesium Sulphate in the granulator. Steam is added for better granulation.
- Uniform and consistent nutrient content.

Advanced drying and cooling system

- Drying at 100 -110°C
- High-tech drying drum. COMPLETE and UNIFORM DRYING of granules.
- Advanced dehumidifier system to cure the finished products.

High Nutrient Formulations

- High nutrient content to ensure high level of efficiency and productivity.
- Reduce application rates.
- Savings in labour, storage and transportation costs.
- Balanced nutrients for better yield.

SUPERFINE Rock Phosphate and Soluble Phosphate

- Uniform binding of all granules.
- Improved solubility of phosphate.
- Improved uptake of phosphate.

Muriate of Potash (MOP)

Description

Origin: Belarus

To know more info, kindly call us at +60(3) 7666 8899 or email to us at enq@fertitrade.com.my

Ag Calcium Nitrate (Greenhouse) 15.5%N 26%CaO

Description

A granular calcium and nitrogen fertilizer which is free of chlorine and heavy metals, fully soluble in water without residues. It can be used together with most water soluble fertilizers except those that contain phosphate or sulphate and it is suitable for all hydroponic and fertigation systems.

Key Benefits:

1. Nitrate can be absorbed directly by plants leading to fast and

predictable growth.

2. Nitrate is readily available to plants as it is stable.

3. Calcium helps to strengthen cell wall, hence increases the plant robustness against disease and insect infections as well as improves the quality and shelf life of crops.

4. Calcium enhances the soil structure and maintains an optimum root environment for high yielding crops.

Nutrient Contents:

Total Nitrogen: 15.5% (14.4% Nitrate, 1.1% Ammonium)

Calcium Oxide: 26.3% (Ca: 19%)

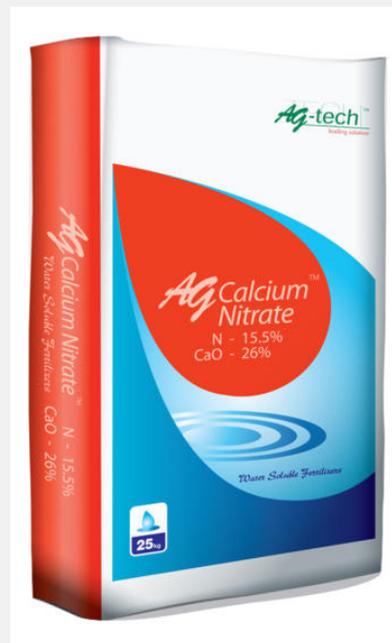

Solubility (20 degree Celsius): 1200 g/L water

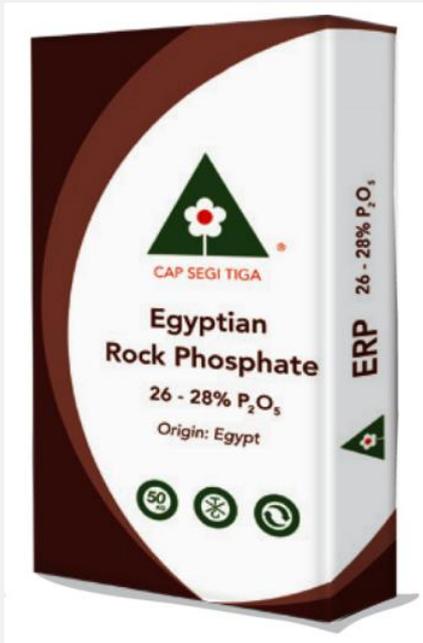

EC (1 g/L at 25 degree Celsius): 1.2 mS/cm

pH (10% solution): 5.0

Colour: White

To know more info or nearest dealer store, kindly call us at +60(3) 7666 8899 or email to us at enq@fertiltrade.com.my

Egyptian Rock Phosphate (ERP)

Description

Origin: Egypt

To know more info, kindly call us at +60(3) 7666 8899 or email to us at enq@fertiltrade.com.my

Ammonium Sulphate

Description

Origin: Taiwan

To know more info, kindly call us at +60(3) 7666 8899 or email to us at enq@fertiltrade.com.my

Ag Hydroponic A & B Set

Description

Since the beginning of fertigation in Malaysia, Fertitrade (M) Sdn Bhd has been marketing full range of top quality and highly soluble specialty fertilisers for hydroponic and fertigation. In fact, Fertitrade is the pioneer of specialty fertilisers in Malaysia 30 years back and it holds agency for top quality water soluble fertilisers produced by world leading manufacturers. Over 25 years ago, we also formulated our own Hydroponic A & B Set fertilisers for various crops.

Advantages of Ag-tech Hydroponics A & B Set Fertiliser:

- Premium hydroponic grade of macronutrients used as raw materials
- 100% European source of micronutrients and chelated EDTA TE
- 100% soluble fertiliser
- 100% quality assurance
- Negligible heavy metal content
- Specially formulated for 15 crops (Bean, Bitter gourd, Brinjal, Capsicum, Chili, Chrysanthemum, Cucumber, Flower, Ginger, Lady's finger, Lettuce, Melon, Rose, Strawberry, Tomato, Vegetable)
- Yields and crop quality assurance

- Trusted and reliable brand

Set A (±25kg)

Calcium, Nitrate-N, Ammonium-N, Potassium, EDTA Fe

Set B (±25kg)

Phosphate, Nitrate-N, Ammonical-N, Potassium, Magnesium, Sulphate, Boron, Molybdate, EDTA Mn, EDTA Zn, EDTA Cu

To know more info or nearest dealer store, kindly call us at +60(3) 7666 8899 or email to us at enq@fertitrade.com.my

Ag Leader 368 1L/4L

Description

Ag Leader 368 contains major plant nutrients organically chelated trace elements, amino acids from vegetal origins which stimulate growth and increases chlorophyll synthesis. It contains glycine betaine which allows:

1. Stimulation of flowering and fruiting;
2. Improve fruit quality (longer shelf life, bigger size and better fruit colour);
3. Improve fruit sweetness;
4. Lower incidence of pests and diseases.

To know more info or nearest dealer store, kindly call us at +60(3) 7666 8899 or email to us at enq@fertitrade.com.my

Ag Leader Mg 1L/4L

Description

Ag Leader Mg contains Magnesium (MgO), Nitrogen (N), Calcium (Ca), chelated trace elements, amino acids from seaweeds and glycine betaine, which corrects magnesium deficiency on horticultural crops and allows:

1. Correction of magnesium deficiency;
2. Better rooting;
3. Growth stimulation;
4. Improvement on photosynthesis;
5. Yield improvements;
6. Anti stress effect;
7. Improve the efficiency of insecticides.

To know more info or nearest dealer store, kindly call us at +60(3) 7666 8899 or email to us at enq@fertitrade.com.my

Ag Leader 469 1L/4L

Description

Ag Leader 469 contains major plant nutrients and trace elements, amino acids from vegetal origins which stimulate growth and chlorophyll synthesis. It also contains glycine betaine which provides growth hormones effect. It allows:

1. Stimulation of tuber formation;
2. Better fruit quality (longer storage life, bigger size and better fruit colour);
3. Improved sugar synthesis and accumulation in fruits;
4. Longer harvesting period;
5. Lower incidence of pests and diseases.

Ag Leader 469 can be used with other chemical products (fungicides, insecticides).

To know more info or nearest dealer store, kindly call us at +60(3) 7666 8899 or email to us at eng@fertitrade.com.my

Ag Leader 954 1L/4L

Description

Ag Leader 954 contains major plant nutrients and trace elements, amino acids from vegetal origins and glycine betaine, which stimulate growth and chlorophyll synthesis. The action of this molecule is similar to the action of growth hormones.

Key Benefits:

1. Better rooting;
2. Vegetative growth stimulation;
3. Improvement of plant photosynthesis;
4. Yield improvement;
5. Anti stress effect.

Ag Leader 954 can be used with other chemical products.

To know more info or nearest dealer store, kindly call us at +60(3) 7666 8899 or email to us at eng@fertitrade.com.my

Ag POWER 1kg/25kg

Description

AG POWER is a fully water soluble fertiliser and it is in crystalline form. It has a balanced ratio of NPK + Mg and contains chelated micro elements. The micro elements are in chelated form, hence the trace elements are

prevented from being locked in the soil and remain available for the plant uptake. The full range of products provides a complete plant nutrition scheme throughout the growth cycle.

AG POWER is specially formulated for direct soil application, fertigation or foliar spraying on fruit crops. It is well known all over Malaysia and widely accepted due to its efficiency and fast response to the plants.

Available formulations:

- 13/40/13 + 2MgO + TE
- 18/18/18 + 2MgO + TE
- 21/21/21 + TE
- 15/5/30 + 3MgO + TE
- 14/10/32 + 3MgO + TE
- 12/12/36 + TE

Key Benefits:

1. 100% fully water soluble
2. Manufactured from carefully selected and premium macronutrients and micronutrients as the raw materials
3. Consist of Ammonical-N and Nitrate for Nitrogen nutrient
4. Fast and efficient plant absorption
5. Free of chloride, sodium and other detrimental materials
6. Provides plant nutrition throughout the growing season
7. Increase plant tissue turgidity, plant resistance to stress & disease, fruit quality and shelf-life.
8. Tailored made formulas for different crops and crop stages
9. Compatible with most pesticides/fungicides thus can be mixed in one spray.

To know more info or nearest dealer store, kindly call us at +60(3) 7666 8899 or email to us at eng@fertiltrade.com.my

Ag EDTA - Ca 10%

Description

Ag EDTA Ca contains water soluble calcium in EDTA chelated form which is specially formulated to provide essential calcium element needed by all crops. Regular application of this product will prevent calcium deficiency in crops. It is suitable to be used for fertigation, foliar or direct soil application.

Key Benefits:

1. EDTA is used to maintain the micronutrients in a stable soluble form in the soil for easy uptake by the roots of the plants.
2. High purity
3. Low hygroscopic product
4. Free flowing and less caking issue
5. Less moisture

6: 100% water soluble

To know more info or nearest dealer store, kindly call us at +60(3) 7666 8899 or email to us at eng@fertiltrade.com.my

Ag EDTA - Cu 14%

Description

Ag EDTA Cu contains water soluble copper in EDTA chelated form which is specially formulated to provide essential copper element needed by all crops. Regular application of this product will prevent copper deficiency symptoms in crops. This product can also address the copper deficiency (peat yellow) symptom in oil palm on peat soil. It is suitable to be used for fertigation, foliar or direct soil application.

Key Benefits:

1. EDTA is used to maintain the micronutrients in a stable soluble form in the soil for easy uptake by the roots of the plants.
2. High purity
3. Low hygroscopic product
4. Free flowing and less caking issue
5. Less moisture
- 6: 100% water soluble

To know more info or nearest dealer store, kindly call us at +60(3) 7666 8899 or email to us at eng@fertiltrade.com.my

Ag EDTA - Zn 14%

Description

Ag EDTA Zn contains water soluble zinc in EDTA chelated form which is specially formulated to provide essential zinc element needed by all crops. Regular application of this product will prevent zinc deficiency in plants and strengthen the immune system against disease. It is suitable to be used for fertigation, foliar or direct soil application.

Key Benefits:

1. EDTA is used to maintain the micronutrients in a stable soluble form in the soil for easy uptake by the roots of the plants.
2. High purity
3. Low hygroscopic product
4. Free flowing and less caking issue
5. Less moisture
- 6: 100% water soluble

To know more info or nearest dealer store, kindly call us at +60(3) 7666 8899 or email to us at eng@fertiltrade.com.my

Ag EDTA - Mn 13%

Description

Ag EDTA Mn contains water soluble manganese in EDTA chelated form to provide manganese nutrient essential for crop growth. Regular application of this product will prevent manganese deficiency in plants. It is suitable for fertigation, foliar or direct soil application.

Key Benefits:

1. EDTA is used to maintain the micronutrients in a stable soluble form in the soil for easy uptake by the roots of the plants.
2. High purity
3. Low hygroscopic product
4. Free flowing and less caking issue
5. Less moisture
- 6: 100% water soluble

To know more info or nearest dealer store, kindly call us at +60(3) 7666 8899 or email to us at eng@fertiltrade.com.my

Ag EDTA - Fe 13.2%

Description

Ag EDTA Fe contains water soluble iron in EDTA chelated form which provides iron nutrient essential for plant growth. It will prevent iron deficiency and is suitable for fertigation, foliar or direct soil application for soil with pH below 6.5.

Key Benefits:

1. EDTA is used to maintain the micronutrients in a stable soluble form in the soil for easy uptake by the roots of the plants.
2. High purity
3. Low hygroscopic product
4. Free flowing and less caking issue
5. Less moisture
- 6: 100% water soluble

To know more info or nearest dealer store, kindly call us at +60(3) 7666 8899 or email to us at enq@fertitrade.com.my

Ag Hibor 60

Description

Ag Hibor contains water soluble boron suitable for correction of boron deficiency in crops. It is a good source of boron for fertigation. It can also be applied as foliar spray on leaves or direct application to soil with low boron content.

Ag ABC

Description

Crops which are intensively and continuously cultivated will exhibit multiple deficiency symptoms due to depletion of micronutrients in the soil. This product contains high percentage of magnesium and 7 micronutrients required by plants which will help to address the deficiency symptoms in over-cultivated crops. The micronutrients are chelated and water soluble for fast and easy absorption by plants. It may be applied to crops as foliar spray or direct soil application.

Key Benefits:

1. High purity
2. Low hygroscopic product
3. Free flowing and less caking issue
4. Less moisture
- 5: 100% water soluble

To know more info or nearest dealer store, kindly call us at +60(3) 7666 8899 or email to us at eng@fertitrade.com.my

Ag Cabor

Description

Ag Cabor is specially formulated with EDTA chelated calcium and boron to prevent blossom end rot. Foliar application before and during flowering will improve fruit setting. It can also be applied with pesticides to strengthen the cell wall of plants, hence increasing the resistance against diseases. The joint usage of calcium and boron will enhance calcium uptake by plants.

Key Benefits:

1. High purity
2. Low hygroscopic product
3. Free flowing and less caking issue
4. Less moisture
- 5: 100% water soluble

To know more info or nearest dealer store, kindly call us at +60(3) 7666 8899 or email to us at enq@fertiltrade.com.my

Ag MICRONutrients

Description

Crops that are intensively cultivated will exhibit multiple deficiency symptoms. This product is specially formulated with 7 types of micronutrients (Cu, Zn, Mn, Fe, B, Mo & MgO) to simultaneously provide the various nutrients required by plants. The nutrients are water soluble and in chelated form for easier assimilation by plants. It can be applied through direct soil application or foliar spraying.

Key Benefits:

1. High purity
2. Low hygroscopic product
3. Free flowing and less caking issue
4. Less moisture
- 5: 100% water soluble

To know more info or nearest dealer store, kindly call us at +60(3) 7666 8899 or email to us at eng@fertitrade.com.my

SoluPotasse

Description

A concentrated potassium fertiliser in white powder form which can dissolve rapidly without any residues. It is low in salt index and free of chloride. It can be used together with most fertilisers (except those containing calcium), pesticides and fungicides for foliar application.

Origin: Belgium

Key Benefits:

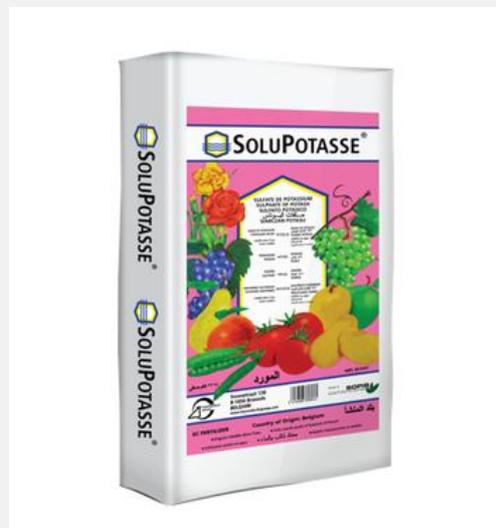

1. Ideal nitrogen-free source of potash which enables farmers to match nitrogen input according to the crop requirement.
2. Improves quality & color in fruits & vegetables.
3. Enhances plant resistance against diseases and bruising.
4. Reduces pH level at root surface, thus improving the availability of P, Fe and other micronutrients.
5. Reduces cation leaching & K loss.

Nutrient Contents:

Potassium Oxide (K₂O): 50% (K: 42%)

Sulphur Dioxide (SO₂): 46.5% (Sulphur: 18%)

Cl: 0.6%

H₂O: 0.02%

pH (1% in water): 2.7

To know more info or nearest dealer store, kindly call us at +60(3) 7666 8899 or email to us at enq@ferti-trade.com.my

EPSO Top 16% MgO

Description

A magnesium and sulphur fertiliser with both nutrients in sulphate form. It is fully soluble in water without residues, making it ideal for foliar application as well as fertigation system. It can be used together with most fertiliser and pesticides. Ag Magnesium is also an ideal source to overcome magnesium and sulphur deficiency in crops.

Origin: Belgium

Key Benefits:

1. *Magnesium: crucial in the process of photosynthesis and improves nutrients uptake; important in the formation of cell wall which helps to enhance plant growth.*
2. *Sulphur: Aids in protein formation in plants and enhances efficiency of applied N; improves plant growth, yield & quality; can be absorbed directly by the roots & leaves.*

Nutrient Contents:

Magnesium (MgO): 16% (Mg: 9.7%)

Sulphur (S): 13%

Solubility (20 degree Celsius): 600 g/L water

pH (10% solution): 8.0

To know more info or nearest dealer store, kindly call us at +60(3) 7666 8899 or email to us at enq@ferti-trade.com.my

KEMAPCO Potassium Nitrate 13-0-46

Description

A nitrogen and potassium fertiliser in fine crystalline powder which is fully soluble in water without residues. It is free of chlorine and heavy metals. It can be used together with most water soluble fertilisers and it is suitable for all hydroponic and fertigation systems. Ag Potassium Nitrate is ideal for usage during flowering and fruit production stage.

Origin: Jordan

Key Benefits:

1. *Nitrate-N: readily available & absorbed directly by plant, leading to fast*

& predictable growth.

2. Potassium: strengthen cell wall, hence increases plant resistance against diseases, pest infection and overcome stress in adverse environment; increases efficiency of other nutrients in plants; enhances fruit quality, color, shape & sugar contents.

Nutrient Contents:

Nitrate-N: 13.7%

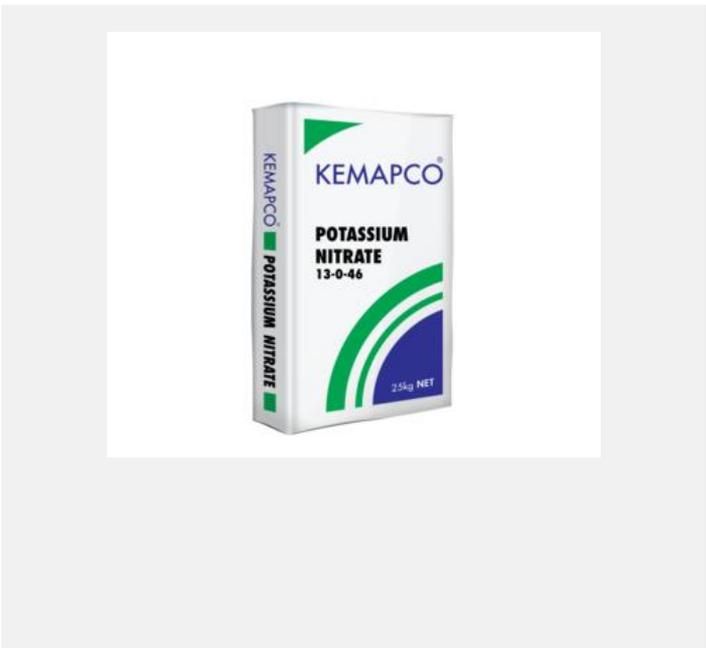

Potassium (K₂O): 46.3% (K: 38.5%)

Solubility at 20 degree Celsius: 250 g/L water

EC (1 g/L at 25 degree Celsius): 1.3 mS/cm

pH (1% solution): 8 - 9

To know more info or nearest dealer store, kindly call us at +60(3) 7666 8899 or email to us at enq@fertiade.com.my

Ag K Sol

Description

A concentrated potassium fertiliser in white powder form which can dissolve rapidly without any residues. It is low in salt index and free of chloride. It can be used together with most fertilisers (except those containing calcium), pesticides and fungicides for foliar application.

Key Benefits:

1. Ideal nitrogen-free source of potash which enables farmers to match nitrogen input according to the crop requirement.
2. Improves quality & color in fruits & vegetables.
3. Enhances plant resistance against diseases and bruising.
4. Reduces pH level at root surface, thus improving the availability of P, Fe and other micronutrients.
5. Reduces cation leaching & K loss.

Nutrient Contents:

Potassium Oxide (K₂O): 50% (K: 42%)

Sulphur Dioxide (SO₂): 46.5% (Sulphur: 18%)

Cl: 0.6%

H₂O: 0.02%

pH (1% in water): 2.7

To know more info or nearest dealer store, kindly call us at +60(3) 7666 8899 or email to us at enq@fertiade.com.my

Ag Magnesium 16% MgO

Description

A magnesium and sulphur fertiliser with both nutrients in sulphate form. It is fully soluble in water without residues, making it ideal for foliar application as well as fertigation system. It can be used together with most fertiliser and pesticides. Ag Magnesium is also an ideal source to overcome magnesium and sulphur deficiency in crops.

Key Benefits:

- 1. Magnesium: crucial in the process of photosynthesis and improves nutrients uptake; important in the formation of cell wall which helps to enhance plant growth.*
- 2. Sulphur: Aids in protein formation in plants and enhances efficiency of applied N; improves plant growth, yield & quality; can be absorbed directly by the roots & leaves.*

Nutrient Contents:

Magnesium (MgO): 16% (Mg: 9.7%)

Sulphur (S): 13%

Solubility (20 degree Celsius): 600 g/L water

pH (10% solution): 8.0

Ag MKP 0-52-34

Description

A phosphorus and potassium fertiliser in fine crystalline powder which is fully soluble in water. It is free of ammonium, chlorine and heavy metals. As AgMKP is also free of nitrogen, it is suitable to be used with nitrogen fertilisers as well as for all hydroponic and fertigation systems. Its low EC renders it ideal for foliar application, reducing the risk of scorching. AgMKP is ideal for usage during flowering and fruit production stage. It can be used together with most water soluble fertilisers except those contain soluble calcium and concentrated magnesium solution.

Key Benefits:

1. Ideal source of potassium and phosphorous for application during the fruit production stage.

2. It can subdue leaf diseases if applied as foliar fertiliser.

3. The high phosphorous content helps to maintain an optimum pH level and increase effectiveness of pesticides sprays.

Nutrient Contents:

Phosphate (P₂O₅): 52% (P: 22.7%)

Potassium Oxide (K₂O): 34% (K: 28.2%)

Solubility at 20 degree Celsius: 200 g/L water

EC (1 g/L at 25 degree Celsius): 0.7 mS/cm

pH (1% solution): 4.2 - 4.5

Colour: White

To know more info or nearest dealer store, kindly call us at +60(3) 7666 8899 or email to us at eng@fertiade.com.my

Agro Vita CaNBor

Description

Soluble Calcium, Boron and Nitrogen based fertilizer which is beneficial to all fruit and vegetable crops.

Key Benefits:

1. Soluble calcium, boron and nitrogen are beneficial to fruit and vegetable crops such as watermelon, cucumber, fruits, citrus, bittergourd, bean crops, durian and others.
2. Boron is important in preventing the formation of deformed fruits whereas calcium can help to prevent cracking in fruits such citrus.

Nutrient Contents:

Total Nitrogen (N): 15.5% (14.4% Nitrate, 1.1% Ammonium)

Calcium Oxide: 26%

Boron: 0.3%

To know more info or nearest dealer store, kindly call us at +60(3) 7666 8899 or email to us at eng@fertiltrade.com.my

Agro Vita NPK 17/5/24

Description

Ammonium Nitrate based NPK fertilizer which contains minimum 70% water soluble P₂O₅. It is in granular form, free flowing and non-powdery.

Key benefits:

1. Nitrate is readily available for plant uptake while ammonical will be converted to nitrate by soil microbes to sustain the nitrogen nutrient for the crops.
2. High water soluble P₂O₅ (minimum 70%).
3. High total nutrient contents (46% of total nutrient) and suitable to apply during flowering and fruiting stage.
4. Suitable for oil palm and fruit crop.

Nutrient Contents:

Total Nitrogen (N): 17% (8% Nitrate, 9% Ammonium)

Phosphate (P₂O₅): 5% (Water soluble P₂O₅: 3.75%)

Potassium (K₂O): 24%

To know more info or nearest dealer store, kindly call us at +60(3) 7666 8899 or email to us at enq@fertitrade.com.my

Agro Vita NPK 16/16/16

Description

Ammonium Nitrate based imported NPK compound from CIS which contains two types of nitrogen source, ie. ammonical (NH₄) and nitrate (NO₃) with minimum 75% water soluble P₂O₅. It is in prilled form, free flowing and non-powdery.

Key Benefits:

1. Nitrate is readily available for plant uptake while ammonical will be converted to nitrate by soil microbes to sustain the nitrogen nutrient for the crops.
2. High water soluble P₂O₅ (minimum 75%) provides fast reaction and suitable to be incorporated into any fertilizer programs. It is extremely beneficial for short term crops like vegetables, supplying the much needed nutrients during the period of exponential growth. This is the most critical period of growth whereby the nutrient has to be supplied fast and in sufficient quantity to ensure a good yield and high quality crops.
3. Balanced NPK nutrients in ratio of 1:1:1 and its high total nutrient content (48% of total nutrient) will provide a balanced growth to all types of cash crop, oil palm, rubber and fruit tree.

Nutrient Contents:

Total Nitrogen (N): 16% (6.4% Nitrate, 9.6% Ammonium)

Phosphate (P₂O₅): 16% (Water soluble P₂O₅: 12%)

Potassium (K₂O): 16%

To know more info or nearest dealer store, kindly call us at +60(3) 7666 8899 or email to us at enq@fertitrade.com.my

Weed Control Mat - Black

Color.....Black
 Polymer.....H.D. Polyethylene

Description

Weed Control Mat is made of high quality Polyethylene yarn with Ultra Violet stabilised properties. It prevents any sunlight penetration. As such, it inhibits any weed growth. Being woven and hence porous, water and nutrients can pass through.

Advantage

Weed Control Mat is an ideal material for all area where weed control is absolutely necessary. It is a cost effective and environmental friendly method compare to conventional way of using herbicide sprays. This products is suitable for use in all crops (*especially for the newly transplanted seedlings of plantations and orchards*) as well as in plant nursery, green house flooring and etc.

Method Of Application

Weed Control Mat on the desired area and hold in place with pegs or cover the edges with soil. In areas where extremely vigorous weeds are present, it is advisable to spray a round of herbicide first.

Repair Tape

| | |
|-----------------------|-------------|
| Thickness..... | 0.168mm |
| Peel Adhesive..... | 9.26N/10mm |
| Ball Tack..... | 32 ball no. |
| Tensile Strength..... | 35.8N/10mm |
| Elongation..... | 23% |

Description

Benefits

- increased strength
- easy-tear, can be torn straight by hand
- flat, smooth surface & high transparency
- good dimension stability
- excellent for repairing small tears

Meiryo

Description

Characteristic

- Bright but cool
- Superior Durability
- Excellent Breathability
- Easy Construction
- High Dimensional Stability And No Joint Slides
- Water and Chemical Resistant
- Reflect Infrared Light (IR)
- Lower Ultra-Violet(UV) Transmittance

Agrinet ML 500

| | |
|-----------------|-------------------|
| Rolls Size..... | 2m x 100m |
| Color..... | Black |
| Shade..... | 50% |
| Polymer..... | H.D. Polyethylene |

Description

To protect people from injury after falling from heights by limiting the distance they fall, and deflecting to dissipate the impact energy. The term also refers to devices for arresting falling or flying objects for the safety of people beyond or below the net.

Applications

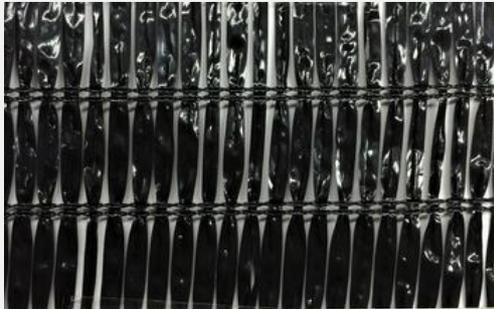

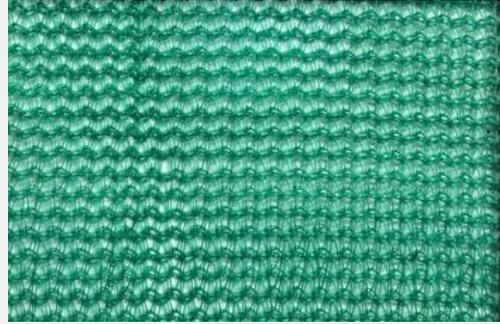

- falling objects protection, protect the workers
- wind and dust controlling, beautify the construction site
- enclosure systems to protect people around
- reduce sound pollution
- sport fencing
- chicken farms
- lorry cover
- public areas

Agrinet ML 500

| | |
|-----------------|-------------------|
| Rolls Size..... | 4m x 100m |
| Color..... | Green / Black |
| Shade..... | 50% |
| Polymer..... | H.D. Polyethylene |

Description

To protect people from injury after falling from heights by limiting the distance they fall, and deflecting to dissipate the impact energy. The term also refers to devices for arresting falling or flying objects for the safety of people beyond or below the net. Agrinet ML 500 are used in construction, insect net, entertainment or other industries.

Agrinet SN 070

Rolls Size.....2m x 100m
 Color.....Black
 Shade.....70%
 Polymer.....H.D. Polyethylene

Description

Agrinet SN070 also called as orchid net. Orchid net could be used to cover your shade house skeleton or greenhouse glazing, to cool it down for your plants. Hobbyists, growers, nurseries, gardeners and farmers should protect their young plants from direct sunlight.

Features

- light weight & easy to install
- UV protection
- chemical resistant
- cost effective
- cooling
- anti-heavy rain

Used

- Greenhouse Covers
- Shade Structures
- Livestock Shading
- Temporary Fencing
- Windbreaks
- Bird Netting
- Swimming Pool Covers
- Truck Tarps
- Tennis Courts and Ball Diamonds

Agrinet SN 050

Rolls Size.....2m x 100m
 Color.....Black
 Shade.....50%
 Polymer.....H.D. Polyethylene

Description

Agrinet SN050 also called as orchid net. Orchid net could be used to cover your shade house skeleton or greenhouse glazing, to cool it down for your plants. Hobbyists, growers, nurseries, gardeners and farmers

should protect their young plants from direct sunlight.

Features

- light weight & easy to install
- UV protection
- chemical resistant
- cost effective
- shading
- anti-heavy rain

Used

- nursery stock
- cabbage
- lettuce
- some orchid varieties
- pot plants

Agrinet VN 320

Rolls Size.....3.7m x 61m
 Color.....White
 Mesh Size.....32 mesh
 Polymer.....H.D. Polyethylene

Description

Insect Netting has been designed and tested to offer the highest quality insect netting available for Cabbage Root Fly, Carrot Root Fly, Green Fly and etc. It is constructed from virgin polyethylene and has a UV life expectancy of over 5 years. Blocks penetration of insects and protects against pests. To be used in protection of flowers, plants and vegetables in green houses or nurseries.

The anti insect net is made of monofilaments that are manufactured with special UV-resistant materials, giving the net durability and longevity.

Advantage

- lightweight and easy to install
- 100% mesh density and shade percentage
- original weaving techniques and material
- reinforced side edges
- extra tensile strength
- high stabilized to be resistant to UV rays

Agrinet VN 160

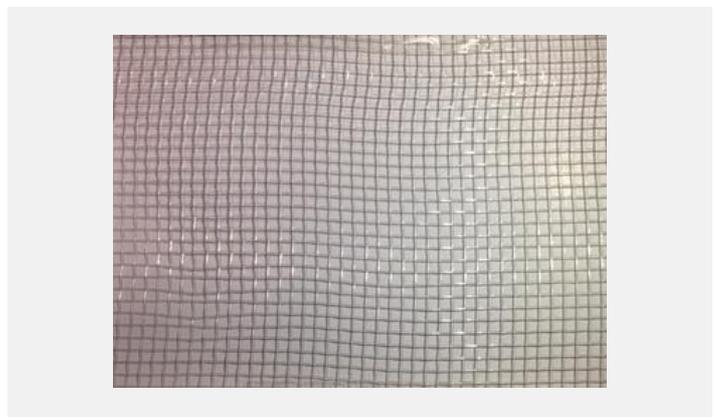

Rolls Size.....3.7m x 61m
 Color.....White
 Mesh Size.....16 mesh
 Polymer.....H.D. Polyethylene

Description

Insect Netting has been designed and tested to offer the highest quality insect netting available for Cabbage Root Fly, Carrot Root Fly, Green Fly and etc. It is constructed from virgin polyethylene and has a UV life expectancy of over 5 years. Blocks penetration of insects and protects against pests. To be used in protection of flowers, plants and vegetables in green houses or nurseries.

The anti insect net is made of monofilaments that are manufactured with special UV-resistant materials, giving the net durability and longevity.

Advantage

- lightweight and easy to install
- 100% mesh density and shade percentage
- original weaving techniques and material
- reinforced side edges
- extra tensile strength
- high stabilized to be resistant to UV rays

Nexus Shading Net (60%)

Rolls Size.....1m x 25m
 Color.....Green / Black
 Mesh Aperture 1mm x 1mm
 Mesh Thickness.....1.0mm
 Structural Weight.....250g/m2
 Polymer.....H.D. Polyethylene

Description

Nexus polymer nettings are manufactured to a wide range of shapes, sizes and colours for numerous industries such as :-

- Golf courses and Driving ranges
- Aquaculture
- Home & Gardening
- Spring Mattress Making
- Filter Cannister Sleeve
- Industrial Uses

Nexus Premium Insect Screen

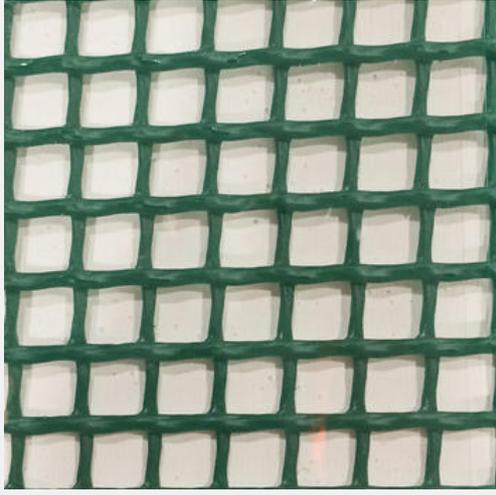

Rolls Size..... 1m x 25m & 1.25m x25m
 Color.....Silver / Green
 Mesh Aperture2mm x 2mm
 Mesh Thickness.....1.5mm
 Structural Weight.....250g/m2
 Polymer.....H.D. Polyethylene

Description

Nexus polymer nettings are manufactured to a wide range of shapes, sizes and colors for numerous industries such as :-

- Golf courses and Driving ranges
- Aquaculture
- Home & Gardening
- Spring Mattress Making
- Filter Cannister Sleeve
- Industrial Uses

Nexus Premium SM 6MM

Rolls Size.....1m x 25m
 Color.....Green / Black
 Mesh Aperture6mm x 6mm
 Mesh Thickness.....2.5mm
 Structural Weight.....350g/m²
 Polymer.....H.D. Polyethylene

Description

Nexus polymer nettings are manufactured to a wide range of shapes, sizes and colours for numerous industries such as :-

- a. Golf courses and Driving ranges
- b. Aquaculture
- c. Home & Gardening
- d. Spring Mattress Making
- e. Filter Cannister Sleeve
- f. Industrial Uses

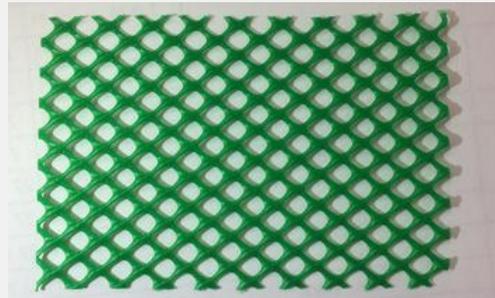

Nexus Honeycomb HM 300

Rolls Size.....1m x 25m
 Color.....Green / Black
 Mesh Aperture3mm x 3mm
 Mesh Thickness.....1.0mm
 Polymer.....H.D. Polyethylene

Description

Nexus polymer nettings are manufactured to a wide range of shapes, sizes and colours for numerous industries such as :-

- a. Golf courses and Driving ranges
- b. Aquaculture
- c. Home & Gardening
- d. Spring Mattress Making
- e. Filter Cannister Sleeve
- f. Industrial Uses

Nexus Premium SM 15MM

Rolls Size.....1m x 25m
 Color.....Green / Silver / Black
 Mesh Aperture15mm x 15mm
 Mesh Thickness.....3.0mm
 Structural Weight.....350g/m2

Nexus polymer nettings are manufactured to a wide range of shapes, sizes and colours for numerous industries such as :-

- a. Golf courses and Driving ranges
- b. Aquaculture
- c. Home & Gardening
- d. Spring Mattress Making
- e. Filter Cannister Sleeve
- f. Industrial Uses

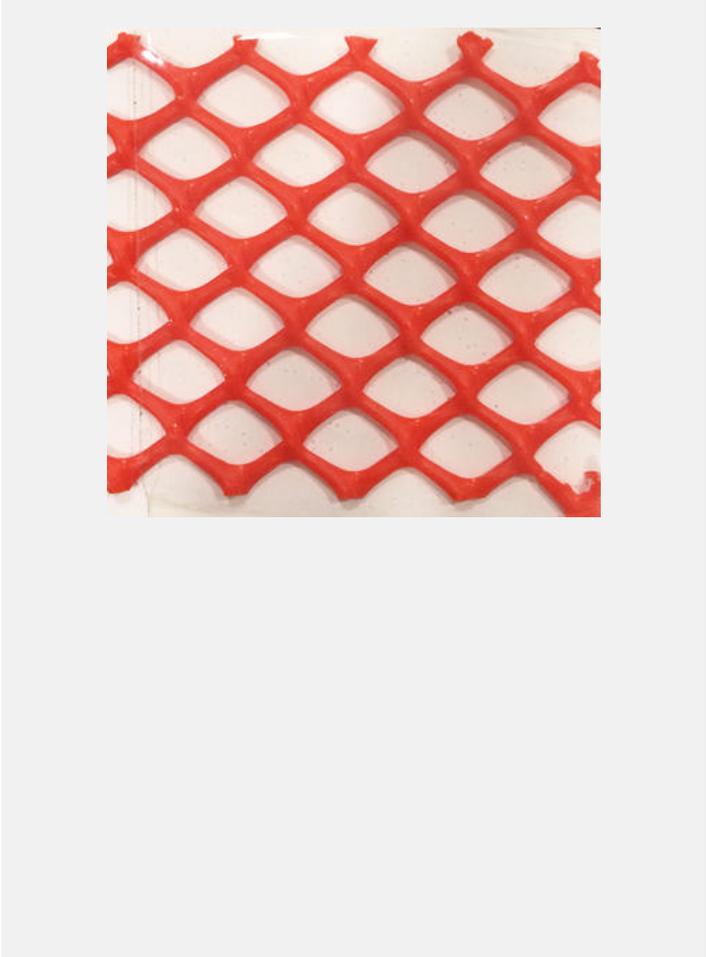

Fertinet CE 111 (TG 100)

Rolls Size.....1m x 25m & 2m x 25m
 Color.....Black / Orange
 Mesh Aperture.....6mm x 8mm
 Mesh Thickness.....2.5mm
 Structural Weight.....425g/m2
 Polymer.....H.D. Polyethylene

Description

Nexus polymer nettings are manufactured to a wide range of shapes, sizes and colours for numerous industries such as :-

- a. Golf courses and Driving ranges
- b. Aquaculture
- c. Home & Gardening
- d. Spring Mattress Making
- e. Filter Cannister Sleeve
- f. Industrial Uses

Fertinet CE 121 (TG 200)

Rolls Size..... 1m x 25m & 2m x25m
 Color..... Black
 Mesh Aperture 6mm x 8mm
 Mesh Thickness..... 3.3 mm
 Structural Weight..... 730g/m2
 Polymer..... H.D. Polyethylene

Description

Nexus extruded Polymer Grids and Mesh are made of high density polyethylene (H.D.P.E.), a material that meet the stringent tensile properties required in Aquaculture works such as fish drying mesh, fish cage and etc.

Fertinet CE 131 (TG 300)

Rolls Size..... 1m x 25m & 2m x 25m
 Color..... Green / Black
 Mesh Aperture 27mm x 27mm
 Mesh Thickness..... 5.2mm
 Structural Weight..... 660g/m2
 Polymer..... H.D. Polyethylene

Description

Nexus extruded Polymer Grids and Mesh are made of high density polyethylene (H.D.P.E.), a material that meet the stringent tensile properties required in general applications works such as :

- a. Aquaculture
- b. Recreation Park
- c. Horticulture
- d. Livestock Farm
- e. Road Construction
- f. Railway Construction

Fertinet CE 153 (TG 500)

Rolls Size.....1m x 25m
 Color.....Green / Black
 Mesh Aperture60mm x 60mm
 Mesh Thickness.....5.9mm
 Structural Weight.....700g/m2
 Polymer.....H.D. Polyethylene

Description

Nexus extruded Polymer Grids and Mesh are made of high density polyethylene (H.D.P.E.), a material that meet the stringent tensile properties required in Civil Engineering works such

as :

- a. Road Construction
- b. Railway Construction
- c. River Bank Protection
- d. Erosion Control
- e. Slope Protection and Reinforcement
- f. Drainage in Landfills & Retaining Walls

Fertinet CE 161 (TG 600)

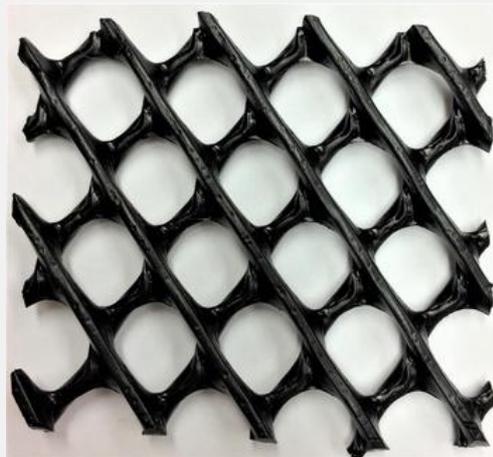

Rolls Size.....1m x 25m & 2m x 25m
 Color.....Black
 Mesh Aperture9mm x 9mm
 Mesh Thickness.....5.0mm
 Structural Weight.....950g/m2
 Polymer.....H.D. Polyethylene

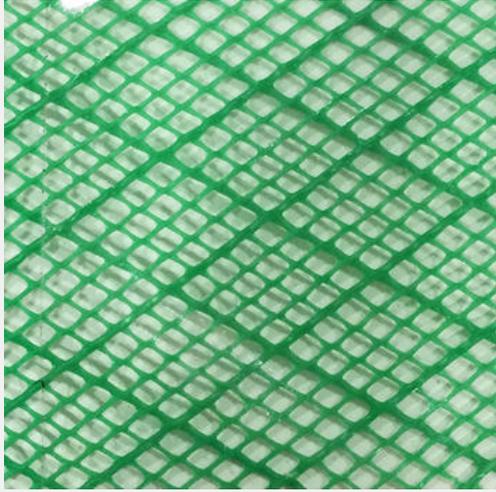

Description

Nexus extruded Polymer Grids and Mesh are made of high density polyethylene (H.D.P.E.), a material that meet the stringent tensile properties required in Civil Engineering works such

as :

- a. Road Construction
- b. Railway Construction
- c. River Bank Protection
- d. Erosion Control
- e. Slope Protection and Reinforcement
- f. Drainage in Landfills & Retaining Walls

Mega Net (Insect Screen)

Rolls Size..... 1m x 24m & 1.25m x 24m
 Color.....Green / Silver
 Mesh Aperture2.0mm
 Mesh Thickness.....1.0mm
 Structural Weight.....250g/m2
 Polymer.....H.D. Polyethylene

Description

Nexus polymer nettings are manufactured to a wide range of shapes, sizes and colours for numerous industries such as :-

- a. Golf courses and Driving ranges
- b. Aquaculture
- c. Home & Gardening
- d. Spring Mattress Making
- e. Filter Cannister Sleeve
- f. Industrial Uses

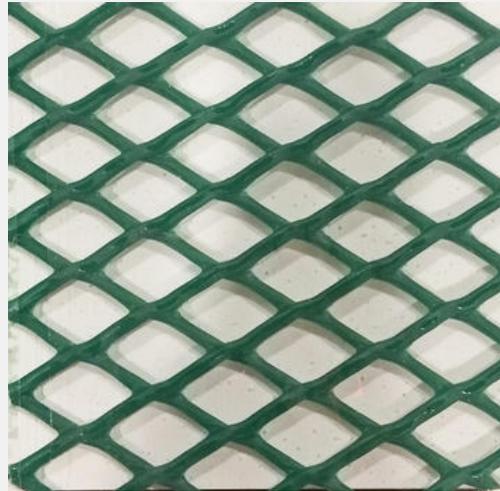

Fertinet DM 125

Rolls Size..... 1.25m x 25m
 Color.....Green
 Mesh Aperture.....7 x 10mm
 Mesh Thickness.....2.5mm
 Structural Weight.....350g/m2
 Polymer.....H.D. Polyethylene

Description

Nexus polymer nettings are manufactured to a wide range of shapes, sizes and colours for numerous industries such as :-

- a. Golf courses and Driving ranges
- b. Aquaculture
- c. Home & Gardening
- d. Spring Mattress Making
- e. Filter Cannister Sleeve
- f. Industrial Uses

CN Net HM 350

Rolls Size.....1m x 25m & 2m x 25m
 Color.....Green / Black
 Mesh Aperture27mm x 27mm
 Mesh Thickness.....4.5mm
 Structural Weight.....500g/m2
 Polymer.....H.D. Polyethylene

Description

Nexus polymer nettings are manufactured to a wide range of shapes, sizes and colours for numerous industries such as :-

- a. Golf courses and Driving ranges
- b. Aquaculture
- c. Home & Gardening
- d. Spring Mattress Making
- e. Filter Cannister Sleeve
- f. Industrial Uses

Fertinet SP 133

Rolls Size.....2m x 25mm
 Color.....Black
 Mesh Aperture.....27mm
 Polymer.....H.D. Polyethylene

Description

Nexus polymer nettings are manufactured to a wide range of shapes, sizes and colours for numerous industries such as :-

- a. Golf courses and Driving ranges
- b. Aquaculture
- c. Home & Gardening
- d. Spring Mattress Making
- e. Filter Cannister Sleeve
- f. Industrial Uses

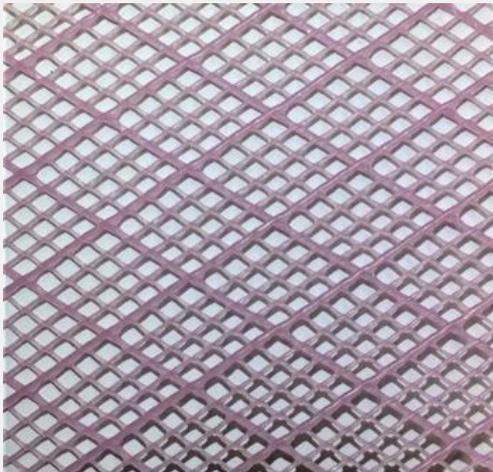

CN Net IS 400

Rolls Size.....1.25m x 25m
 Color.....Pink
 Mesh Aperture2mm
 Polymer.....H.D. Polyethylene

Description

Nexus polymer nettings are manufactured to a wide range of shapes, sizes and colours for numerous industries such as :-

- a. Golf courses and Driving ranges
- b. Aquaculture
- c. Home & Gardening
- d. Spring Mattress Making
- e. Filter Cannister Sleeve
- f. Industrial Uses

CN Net DM 360

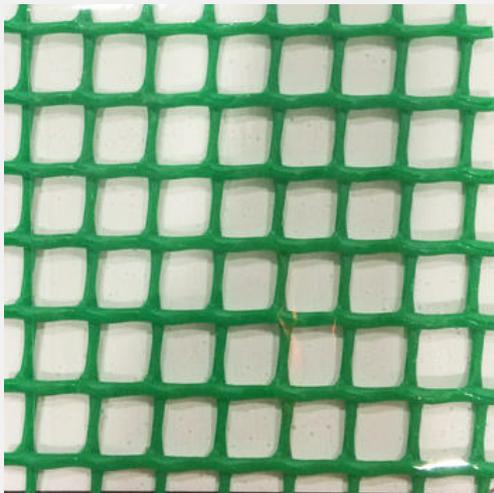

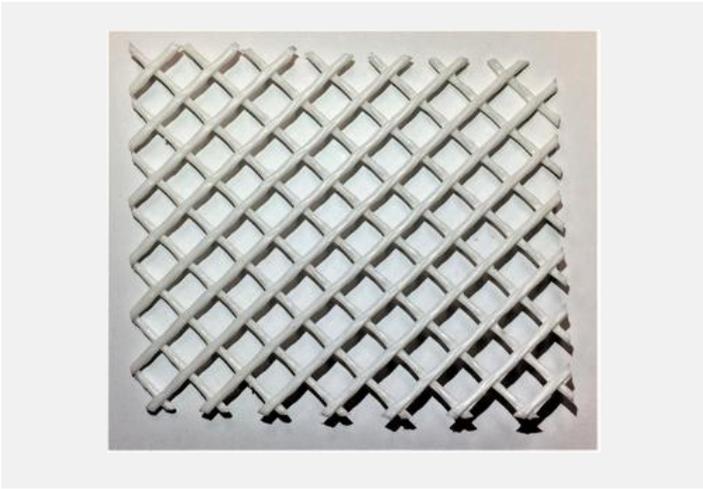

Rolls Size.....1m x 25m

Color.....White / Black
 Mesh Aperture.....4 x 4mm
 Mesh Thickness.....2.0mm
 Structural Weight.....350g/m2
 Polymer.....H.D. Polyethylene

Description

Nexus polymer nettings are manufactured to a wide range of shapes, sizes and colours for numerous industries such as :-

- a. Golf courses and Driving ranges
- b. Aquaculture
- c. Home & Gardening
- d. Spring Mattress Making
- e. Filter Cannister Sleeve
- f. Industrial Uses

Nexus Standard SM 6MM

Rolls Size.....1m x 25m
 Color.....Green / Black / Silver
 Mesh Aperture6mm x 6mm
 Mesh Thickness.....2.5mm
 Structural Weight.....280g/m2
 Polymer.....H.D. Polyethylene

Description

Nexus polymer nettings are manufactured to a wide range of shapes, sizes and colours for numerous industries such as :-

- a. Golf courses and Driving ranges
- b. Aquaculture
- c. Home & Gardening
- d. Spring Mattress Making
- e. Filter Cannister Sleeve
- f. Industrial Uses

Nexus Standard SM 11MM

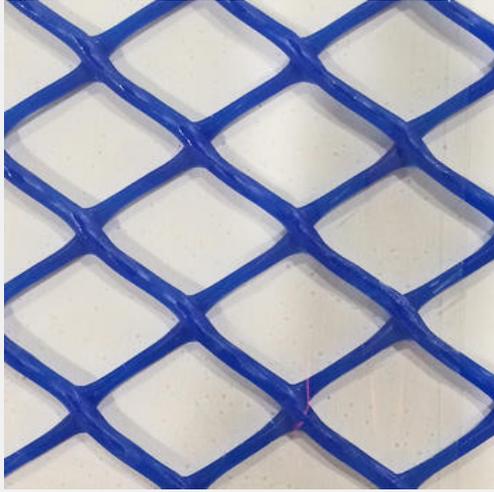

Rolls Size.....1m x 25m
 Color.....Brown / Black / Silver / Green
 Mesh Aperture.....11mm x 11mm
 Mesh Thickness.....2.7mm
 Polymer.....H.D. Polyethylene

Description

Nexus polymer nettings are manufactured to a wide range of shapes, sizes and colours for numerous industries such as :-

- a. Golf courses and Driving ranges
- b. Aquaculture
- c. Home & Gardening
- d. Spring Mattress Making
- e. Filter Cannister Sleeve
- f. Industrial Uses

Nexus Standard DM 12MM

Rolls Size.....1m x 25m
 Color.....Blue / Silver
 Mesh Aperture12mm x 12mm
 Mesh Thickness.....3.0mm
 Structural Weight.....350g/m²
 Polymer.....H.D. Polyethylene

Description

Nexus polymer nettings are manufactured to a wide range of shapes, sizes and colours for numerous industries such as :-

- a. Golf courses and Driving ranges
- b. Aquaculture
- c. Home & Gardening
- d. Spring Mattress Making
- e. Filter Cannister Sleeve
- f. Industrial Uses

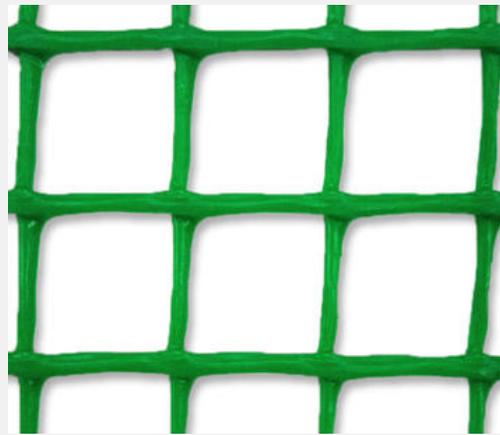

Nexus Standard SM 15MM

Rolls Size.....1m x 25m
 Color.....Green / Black / Silver
 Mesh Aperture15mm x 15mm
 Mesh Thickness.....3.0mm
 Structural Weight.....350g/m²
 Polymer.....H.D. Polyethylene

Description

Nexus polymer nettings are manufactured to a wide range of shapes, sizes and colours for numerous industries such as :-

- a. Golf courses and Driving ranges
- b. Aquaculture
- c. Home & Gardening
- d. Spring Mattress Making
- e. Filter Cannister Sleeve
- f. Industrial Uses

CN Net DM 1235

Rolls Size.....2m x 25m
 Color.....Black
 Mesh Aperture12mm x12mm
 Mesh Thickness.....3mm
 Polymer.....H.D. Polyethylene

Description

Nexus polymer nettings are manufactured to a wide range of shapes, sizes and colours for numerous industries such as :-

- a. Golf courses and Driving ranges
- b. Aquaculture
- c. Home & Gardening
- d. Spring Mattress Making
- e. Filter Cannister Sleeve
- f. Industrial Uses

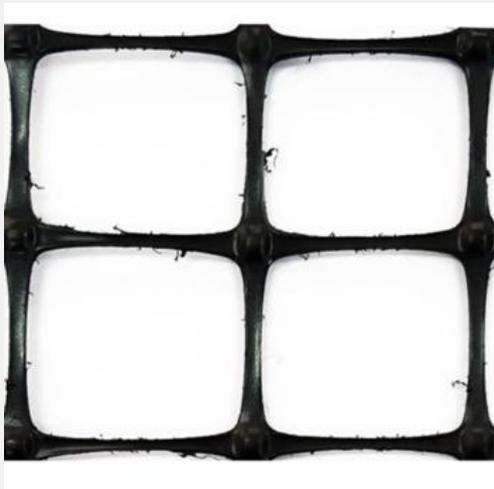

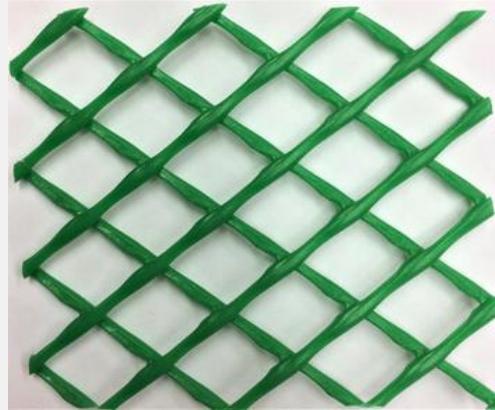

CN Net DM 1000

Rolls Size..... 1.25m x 25m
Color..... Green
Mesh Aperture..... 10mm x 10mm
Mesh Thickness..... 2.5mm
Structural Weight..... 400g/m²
Polymer..... H.D. Polyethylene

Description

Nexus extruded Polymer Grids and Mesh are made of high density polyethylene (H.D.P.E.), a material that meet the stringent tensile properties required in Civil Engineering works such as :

- a. Road Construction
- b. Railway Construction
- c. River Bank Protection
- d. Erosion Control
- e. Slope Protection and Reinforcement
- f. Drainage in Landfills & Retaining Walls

Fertinet EG 2020

Rolls Size..... 1.2m x 25m , 1.5m x 25m , 1.8m x 25m
Color..... Black
Mesh Aperture..... 40mm x 40mm
Mesh Thickness..... 4.1mm
Polymer..... H.D. Polyethylene

Description

Nexus extruded Polymer Grids and Mesh are made of high density polyethylene (H.D.P.E.), a material that meet the stringent tensile properties required in Civil Engineering works such as :

- a. Road Construction
- b. Railway Construction
- c. River Bank Protection
- d. Erosion Control
- e. Slope Protection and Reinforcement
- f. Drainage in Landfills & Retaining Walls

Fertinet EG 2020L

Rolls Size..... 1.2m x 25m , 1.5m x 25m , 1.8m x 25m
Color..... Black
Mesh Aperture..... 66mm x 66mm
Mesh Thickness..... 4.3mm
Polymer..... H.D. Polyethylene

Description

Nexus extruded Polymer Grids and Mesh are made of high density polyethylene (H.D.P.E.), a material that meet the stringent tensile properties required in Civil Engineering works such as :

- a. Road Construction
- b. Railway Construction
- c. River Bank Protection
- d. Erosion Control
- e. Slope Protection and Reinforcement
- f. Drainage in Landfills & Retaining Walls

Fertinet HF 101

Rolls Size..... 1.8m x 25m
 Color..... Green / Black
 Mesh Aperture 48mm x 48mm
 Mesh Thickness..... 6mm
 Polymer..... H.D. Polyethylene

Description

Nexus extruded Polymer Grids and Mesh are made of high density polyethylene (H.D.P.E.), a material that meet the stringent tensile properties required in Civil Engineering works such as :

- a. Road Construction
- b. Railway Construction
- c. River Bank Protection
- d. Erosion Control
- e. Slope Protection and Reinforcement
- f. Drainage in Landfills & Retaining Walls

Fertinet HM 1300

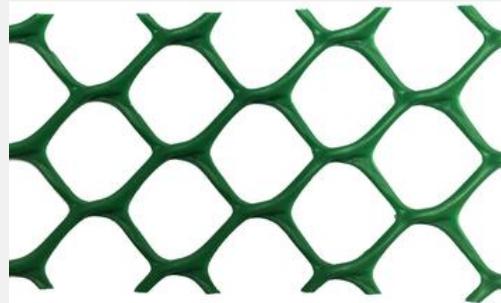

Rolls Size..... 1m x 25m & 2m x 25m
 Color..... Green / Black
 Mesh Aperture..... 13mm x 13mm
 Mesh Thickness..... 2.5mm
 Polymer..... H.D. Polyethylene

Description

Nexus extruded Polymer Grids and Mesh are made of high density polyethylene (H.D.P.E.), a material that meet the stringent tensile properties required in Civil Engineering works such

as :

- a. Road Construction
- b. Railway Construction
- c. River Bank Protection
- d. Erosion Control
- e. Slope Protection and Reinforcement
- f. Drainage in Landfills & Retaining Walls

Nexus SP 168

Rolls Size..... 1.5m x 25m
 Color..... Black
 Mesh Aperture 45 x 45mm
 Polymer..... H.D. Polyethylene

Description

Nexus extruded Polymer Grids and Mesh are made of high density polyethylene (H.D.P.E.), a material that meet the stringent tensile properties required in Civil Engineering works such

as :

- a. Road Construction
- b. Railway Construction
- c. River Bank Protection
- d. Erosion Control
- e. Slope Protection and Reinforcement
- f. Drainage in Landfills & Retaining Walls
