Recycled Pallet

Description

We recycle thousands of pallets each month. All pallets are repaired in accordance with the top quality standards. We have become a one-stop centre for manufacturing, repair and recycling of pallets.

2 Ways Pallet

Description

Two way wooden pallet also known as Beam Pallet or Stringer Pallet.

It can be easily lifted two sides (front and back) using lifting tools such as hand jack or fork-lift.

A frame of 3 parts is used to build, which is top deck, stringer and bottom deck.

4 Ways Pallet

Description

It can be easily lifted in all four dimension using lifting tools such as folk-

life and hand jack. (front, back, left and right)

Ideally for product need to be transport and lifted from many sides due to space and speed concern. Mainly for storage management.
