

## Swimming Pools

### Description

#### PRODUCT NAME

1. **BIO SPC** - 70% available swimming pool chlorine.
2. **BIO SPF** - Liquid swimming pool flocculant.
3. **BIO SPSA** - Liquid pH control.
4. **OT SOLUTION** - For testing of available chlorine in swimming pool water.
5. **PHENOL RED** - For testing of pH in swimming pool water.

For more details on our product, please feel free to contact our Sales Representative or e-mail to us at [main@biocosmic.com](mailto:main@biocosmic.com)

## Ware Washing

### Description

#### PRODUCT NAME

1. **DM WASH** - Dishwashing machine detergent
2. **DM RINSE** - Dishwashing machine drying agent
3. **DM SCALE** - Deliming and derusting agent
4. **OV CLEAN** - Oven cleaner
5. **PINE 200** - Pine disinfectant and cleaner
6. **BIO PINE GEL** - Jelly type pine disinfectant
7. **HDFC** - Heavy duty floor degreaser
8. **BIO CL** - Sanitizer and cleaner for fangs stains on the bathroom's wall, rubber mats, curtains, etc....
9. **LHS-150** - Bactericidal liquid hand soap
10. **DISH WASH** - Dishwashing liquid
11. **BIO GL** - Coffee and tea stains remover
12. **BIO S SHINE** - Silver wares detarnisher
13. **BIOGRADE DL** - A drain line product to reduce the buildup of grease, fats and organic wastes in drain lines.
14. **BIOGRADE GT** - A grease trap treatment system for the food service industry to digest fats and organic wastes that accumulate in grease traps and drain lines.
15. **ODOR ELIMINATOR** - Is an organic liquid extracted from plant using heat process.
16. **BIO SILVER ACT** - Powdered cleaning and detergent for pots and pans and for soaking of silver wares together with aluminium foil to give a brighter shine.

## 17. THERMAL - Heating fuel

For more details on our product, please feel free to contact our Sales Representative or e-mail to us at [main@biocosmic.com](mailto:main@biocosmic.com)

## Rubber Gloves

### Description

### PRODUCT NAME

1. **NEUTRALIZER** - Chlorine eliminator.
2. **PAC** - Water based polymer C/W silicone.
3. **CTF** - Coagulant tack free.
4. **NF 13** - Is a alkaline base cleaner mainly to remove baked on latex residues.
5. **BIOGARD** - Is a highly anti - microbial product to protect modified micro starch suspension. Large saving cost in starch from the correct usage of the product.
6. **LX STABILIZER** - Stabilizer to the latex.
7. **STAB COMB** - Stabilizer to the latex.
8. **OFPC** - Is designed primarily for off line and on line coating of the NR latex glove to replace or reduce the usage of powder onto the surface.
9. **SLA 101** - Corn starch reducer for slurry tank.
10. **IOR 12** - Is clear acidic liquid compound. It is used as cleaning agent to remove inorganic compound and baked on rubber residues from ceramic formers.
11. **FC - 5H** - Is an alkaline liquid former cleaner specially formulated for removal of baked on latex and polymer residues.
12. **FC KLEEN** - Is the latest in our range of alkaline former cleaners. This product offers efficient removal of baked-on latex and polystearate residues from the former surface.
13. **BIO OLPC** - Is the latest polymer designed for the off line coating of natural rubber gloves. The off-line polymer coating process eliminates the chlorination process to produce powder free gloves.
14. **BIO SR** - Is specially designed to reduce the usage of modified corn-starch in the slurry tanks.
15. **SSA / PAC** - Is a water based polymers specially formulated to give an excellent ' slip ' effect to nitrile latex and NR latex gloves.
16. **BIO FLEXI COAT** - Is the latest range of water-based polymer specially formulated to coat on to NR latex gloves for excellent slip and easy donning.

For more details on our product, please feel free to contact our Sales Representative or e-mail to us at [main@biocosmic.com](mailto:main@biocosmic.com)

## Metal

### Description

### PRODUCT NAME

1. **M-SEAL** - Is a well developed product to satisfy the market demand for sealing of anodised aluminium with excellent result.

2. **RUST INHIBITOR** - An excellent water soluble rust preventative product currently in the markets with good economical value for usage and it is one of our product range in corrosion protection of metals.
3. **FEP 100** - A liquid iron phosphating agent for cold roll and steel products.
4. **BIO ZNP 201** - A medium temperature zinc phosphating agent for steel and galvanised products.
5. **BIO PHOS RT** - A low temperature zinc phosphating agent for steel and galvanised products.
6. **EG 100** - A phosphate coating for electro galvanized materials.
7. **BIO ZCC COAT** - A chromate conversion coating for hot - dip galvanized and Electro - galvanized materials.
8. **ZNP 200 ACC** - Zinc phosphating.
9. **PHOS RT ACC** - Zinc phosphating accelerator.
10. **ACID INHIBITOR** - Sulfuric acid additive.
11. **A CONTROL** - pH control.
12. **BIO DERUST 3** - A phosphoric acid based deruster, degreaser and light iron phosphating agent for mild steel products.
13. **BIO DERUST 5** - Deruster degreaser
14. **BIO DERUST 6** - A phosphoric acid based deruster, degreaser and rust inhibitor for steel products.
15. **BIO DERUST 9** - Acidic deruster degreaser for hot-roll or carbon steel.
16. **BIO DERUST 39** - A phosphoric acid based deruster, degreaser and light iron phosphating for both cold and hot roll metal.
17. **BIO DERUST 98** - A hydrochloric acid based deruster with pickling inhibitor.
18. **BIO ALKLEEN AC** - A liquid acidic cleaner with slight etching effect.
19. **ALKLEEN 23** - A powder non-etch non silicated low foam alkaline degreaser. Can be used for soak or spray.
20. **ALKLEEN 26** - Is a alkaline degreaser with slight etch effect for aluminium and steel product.
21. **BIO ALKLEEN 26B** - Is a high alkaline degreaser with slight etch effect for aluminium and steel product.
22. **BIO PHOSKLEEN LT** - A powder low temperature alkaline degreaser prior to phosphating.
23. **FEKLEEN 10** - A powder low foam alkaline degreaser for spray or soak cleaning process.
24. **FEKLEEN LF** - A liquid low foam low temperature degreaser for spray or soak cleaning process.
25. **BIO ALETCH AC** - A liquid acidic etchant use for preparing aluminium surfaces prior to chromate conversion coating.
26. **BIO ALETCH 45** - A liquid caustic etchant use for stripping anodic coating prior to chromate conversion coating.
27. **BIO ALETCH 90** - A powder caustic etchant produce uniform satin finishes and long life solution without any aluminate deposits.
28. **BIO ALETCH 150L** - A liquid long life alkaline etchant additive allows to get uniform finishes regardless of the aluminate contents of the solution.
29. **BIO ALCOAT GC** - Is a chromate conversion coating material used to produce coloured conversion from deep gold to iridescent yellow.
30. **BIO ALCOAT 5C** - Is a chromate conversion coating material used to produce coloured conversion from colourless to iridescent yellow.

31. **BIO ALCOAT 7** - Is a chromate conversion coating material used to produce amorphous coat of green colour layer.

32. **ALCOAT 12L** - An iridescent, golden coloured chromate conversion coating that is decorative and resists corrosion.

33. **12L ACCELERATOR** - A liquid concentrate for controlling the rate of coating of aluminium in Alcoat 12L.

34. **NRC** - No rinse yellow gold chromating.

35. **CS MAIN** - Low temperature sealing process.

36. **BIO HOTSEAL 95** - Additive for hot sealing bath. It prevent the powdery formation deposits on anodised aluminium.

37. **BIO HOTSEAL AS** - Energy saving and smut free warm seal process to be operated between 77 ~ 88 °C.

38. **BIO DESMUT 5N** - A liquid neutralizer and surface activator prior to chromate process.

39. **BIO ANOADD** - A liquid additive for anodizing baths. It give faster and thicker coats and allows to work at higher temperature (28 °C).

40. **BIO PAINT RIP** - Chlorinated solvent based paint remover suitable for steel and aluminium by soaking or brush on process.

41. **BIO PAINT OFF** - Phenolic based paint remover for steel by soaking process.

For more details on our product, please feel free to contact our Sales Representative or e-mail to us at [main@biocosmic.com](mailto:main@biocosmic.com)

## Laundry

### Description

#### PRODUCT NAME

1. **LAUNTEX P** - Laundry detergent c/w optical brighten and perfume.
2. **ZHEN HAU** - Laundry detergent.
3. **BIO SL4-L** - Heavy duty detergent.
4. **HV DETERGENT** - Powdered heavy duty detergent.
5. **BIO SEARCH** - Low temperature laundry detergent.
6. **BIO DL** - Powdered chlorine bleach for white item only.
7. **BIO GL** - Oxygen bleach for colour item.
8. **COS OZO** - Powerful oxygen bleach.
9. **BIO OXB-L** - Liquid oxygen bleach.
10. **BIO AB** - Acidic bleach.
11. **BIO SOUR** - Laundry alkaline reducer.
12. **SOFTNESS A** - Fabric softness c/w apple perfume.
13. **SOFTI G** - Is liquid, opaque concentrate, which acts as a complete fabric softener and conditioner.
14. **BIO STARCH** - Pre-cooked laundry starch.
15. **BIO ACT** - Liquid laundry emulsifier.
16. **BIO EMI-L** - Liquid emulsifier booster.
17. **BIO NEU-L** - Liquid detergent neutralizer.
18. **BIO FLUSH** - Chlorine neutralizer.
19. **GPC - 200** - Collar and cuff stains remover.

20. **BIO SOF-L** - Softness

21. **OV CLEAN** - Heavy duty stains remover for cook, jacket, apron, etc...

22. **BIO FERGO** - Powdered iron stains remover.

23. **BIO GL** - Is use for removal of stains on coloured fabrics.

24. **STREETAN** - Coffee, tea stains beverage stains remover.

25. **STREEPO** - Preparation, yellowish, blodd stains remover.

26. **YELLOW GO** - Dye stripper.

27. **EZ OFF** - Iron plate stains remover.

For more details on our product, please feel free to contact our Sales Representative or e-mail to us at [main@biocosmic.com](mailto:main@biocosmic.com)

## Industrial

### Description

#### PRODUCT NAME

1. **COIL KLEEN B** - Air - conditioner cooling coil cleaner Alkaline based.

2. **HANDY GEL** - Workshop hand cleaner Gel.

3. **BIO COPPER BRIGHT** - Copper cleaner and brightener.

4. **HD FLUX CLEANER** - Aluminium brightener.

5. **CAR RINSE** - Car wash final rinse water repellent.

6. **BIO DEBURR GM** - Liquid general purpose deburring chemicals.  
Tumbling soap.

7. **BIO HBC** - Is a hand barrier cream consisting of several silicone fluid ingredients and cosmetic grade emulsifiers to give inert protective coating and water repellents film on to the skin.

8. **SS PICKLING GEL** - Workshop hand cleaner gel.

9. **METAL COOL-CUT AP-18** - Vegetable based machining coolant.

For more details on our product, please feel free to contact our Sales Representative or e-mail to us at [main@biocosmic.com](mailto:main@biocosmic.com)

## Housekeeping

### Description

#### PRODUCT NAME

1. **BIO F - POLISH** - Floor wax polish

2. **BIO F - SEAL** - Floor wax sealer.

3. **BIO F - STRIP** - Floor wax stripper.

4. **BIO F - SHINE** - Spray buff polish.

5. **LHS-150** - Bactericidal liquid hand soap.

6. **BIO WASH** - All purpose cleaner for room, toilet, etc....

7. **MPA** - Multi purpose cleaner c/w apple fragrance.

8. **KLEEN UP** - Mosaic floor cleaner.

9. **GLASS KLEEN** - Window glass cleaner.

10. **BIO PINE GEL** - Jelly type pine disinfectant.

11. **TOILET KLEEN** - Public area washroom toilet cleaner.
12. **TOUGH GOAT** - Permanent floor sealer for slide, cement, etc...
13. **KLEEN PLUS** - Is a concentrated neutral general purpose liquid detergent with sanitizer. It is formulated from a synthetic blend of non-ionic surfactants at a ratio that gives synergistic cleaning properties.
14. **CARPET KLEEN** - Carpet shampoo.
15. **CEMENT SOFT** - Cement stains remover.
16. **HUNTER** - Heavy duty floor cleaner effectively cleans and remove dirt, etc....
17. **DEODORANT BLOCK** - Urinal block.
18. **GPC** - General Purpose Cleaner.
19. **BODY SHAM** - Body Shampoo.
20. **BIO WASH** - All purpose cleaner for room, toilet, etc....
21. **ODOR ELIMINATOR** - Is a pure organic liquid to neutralize odor generally generated by activities of bacteria that inhibited on food medium.

For more details on our product, please feel free to contact our Sales Representative or e-mail to us at [main@biocosmic.com](mailto:main@biocosmic.com)

## Food Industries

### Description

### PRODUCT NAME

1. **COS 1D** - Mild acidic liquid iodophor detergent and sanitizer fo food processing plant, refuse cans, floors, food service industries.
2. **COS 90** - A heavy duty alkaline cleaner with sequestering agent for tough CIP jobs and found suitable in bottle washing operation.
3. **COS M** - A pink, free flow food grade alkaline detergent used manually to remove a wide range of organic soils, e.g. - animal and vegetables fats, grease and protein found in dairy, cannery, beverage, candy, meat packer, fish packer and poultry plants and other areas like floors and walls.
4. **COS QUAT** - A mixture of liquid quaternary ammonium compound to disinfect, sanitize and deodorize in breweries, dairy, beverage, confectionery, bakeries and other food processing plants.
5. **COS KLEEN** - Composed of organic solvents, milk alkalis emulsifying agents, inhibitors and detergents for heavy duty and general maintenance to degrease kitchen areas, ovens, shower stalls, refrigerator units, conveyors, engines, etc..
6. **COS HDB** - Blends of surfactants and quaternary ammonium compound to emulsify disperse, deodorise, clean and sanitize at one time.
7. **COS 51** - An amphoteric sanitizer that is non-toxic, odourless and odourless and do not contain chlorine or other corrosive substances such as acids or alkalis that is detrimental to metals, rubber, plastics, glass and wood as well as to the skin, sanitizing of surfaces, machinery, equipment, etc... and effective against yeast, fungi, Gram - Positive and Gram - Negative bacteria.
8. **COS NITI** - An organic halogen complex sanitizer provides bactericidal activity which kills both gram positive and gram negative microorganisms. Chlorine content : 3.25%
9. **BIO CL** - A pink, free flowing compound composes of chemical combination of alkaline sodium phosphate and

sodium hypochlorite in crystal that has a wide range of sanitising and cleaning in milk processing plants, dairy farms, breweries, beverage plants, bakeries, restaurant, meat processing plants, poultry and other institutional areas.

10. **O CLEAN S** - A powerful oven cleaner to remove baked-on soils, carbon and greases in kitchen ovens, grilles and fryers.

11. **KLEEN PLUS** - A concentrated neutral general purpose liquid detergent with sanitizer on manual and foam cleaning for all food equipment.

12. **COS LUBE** - A water soluble low foaming conveyor lubricant designed primarily to lubricate, slat chains bottle and can conveyors in dairy beverage, canning and other food processing industries.

13. **COS 11** - Specially formulated liquid product for cleaning-in-place ( CIP ) in food, beverage and dairies processing plants.

14. **COS 2 in 1** - Specially designed two in one product, highly alkaline and low foam cleaner with chlorine sanitizer which cleans and sanitizes at the same time to meet current industrial needs. It is effective and cost saving in CIP. Not recommended to use on aluminium surfaces or its alloys.

15. **COSAN** - An organic chlorine sanitizer developed for application in dairy, bakeries, canneries, poultry, meat and other food processing plant ( 16% available chlorine ). Clean surface before applying COSAN. Sanitation on the equipment surfaces, deodorising ( Aerial Sanitation ) an egg sanitation.

16. **COS 22** - A premium spray sanitizer ( QAC ) for use directly on surfaces required sanitized and leave dry for the bread and ice cream industry.

17. **COS AC** - An acidic liquid cleaner for CIP system, soak and spray application in food processing industries to remove milestone in dairy plant, mineral film and protein contaminants commonly found in the brewing industry.

18. **COS KLEEN** - Is a bactericidal hand soap which has excellent cleaning properties and contains emollients to protect the skin, ensuring the hands remains supple and free from dryness.

19. **VEG KLEEN** - Is formulated to meet very stringent food grade chemicals for cleaning and sanitizing of poultry, fish, fruits and vegetables.

20. **SANI - VEG** - Is designed to combat bad odour in meat processing area as well as drainage system killing the bacteria effectively and left no bad smell.

21. **BIO QUAT -C** - Is a mixture of liquid quaternary ammonium compound which serve to disinfect, sanitize and deodorise. It is widely used in breweries, dairy beverage confectionery, bakeries and other food processing plants for sanitizing.

22. **COS PAA** - A biocide based on a stabilised equilibrium of peracetic acid, hydrogen peroxide acetic acid and surfactant.

23. **COS 2 A** - Is a specially designed alkaline cleaner with good chelating power and low foaming which is suitable to be used in circulation cleaning.

24. **COS FOAM** - For cleaning at the receiving area, slaughtering and deboning area.

25. **BIO GRADE GT** - A grease trap treatment system designed for the food service industrial to digest fats and organic wastes that accumulate in grease traps and drains lines.

For more details on our product, please feel free to contact our Sales Representative or e-mail to us at [main@biocosmic.com](mailto:main@biocosmic.com)

## Cooling Tower Water Treatment Chemicals

### Description

#### PRODUCT NAME

1. **COS 120** - Corrosion and scale preventive in the cooling tower water.
2. **COS 30ABF** - Cooling tower algicide.
3. **COS 30MBF** - Cooling tower algicide.
4. **CT 18** - Is a 4 in 1 concentrated liquid consisting dispersants, biocides, corrosion and scale inhibitors for total protection of recirculating industrial cooling water system.
5. **CT 18 A** - 4 in 1 Cooling Tower Water Treatment chemical.
6. **BIO 112 CH** - Corrosion and scale prevention in the chilled water system.
7. **DERUST 98** - Acidic cleaning chemicals.
8. **COIL KLEEN** - Cooling cleaner - Acid based.
9. **COIL KLEEN B** - Air - con cooling cleaner - Alkaline based.

For more details on our product, please feel free to contact our Sales Representative or e-mail to us at [main@biocosmic.com](mailto:main@biocosmic.com)

## Boiler Water Treatment Chemicals

### Description

#### PRODUCT NAME

1. **BIO FOA** - Fuel oil additive.
2. **BIO WTAC** - Boiler water alkalinity control of pH.
3. **BIO WTBD** - Sludge dispersant and conditioner.
4. **BIO WTBP** - Complex polyphosphate for scale control.
5. **BIO WTBS** - Oxygen scavenger for corrosion prevention.
6. **BIO WTLPC** - Liquid type scale and corrosion control for vaporate type of boiler.
7. **WTHD** - Oxygen scavenger.
8. **WTPA** - Water hardness controller.
9. **BIO OSL** - Liquid base oxygen scavenger.
10. **BT 31** - Neutralizing volatile amine.
11. **DERUST 98** - Acidic cleaning chemicals.
12. **COS 248** - Passivating of metal after acid cleaning of boilers.
13. **COS OLD** - On line descaling.

For more details on our product, please feel free to contact our Sales Representative or e-mail to us at [main@biocosmic.com](mailto:main@biocosmic.com)
