

Heat Seal Tester

Oxygen Permeability Tester

Universal Strength Tester

Gas Chromatography Tester

Water Vapor Transmission Rate Tester

## Lab Services

Category ..... Lab Services

### Description

Advance quality control to meet the rigorous request of our clients worldwide. Quality control is more than just testing the products as it comes off the line, it begins with strict supplier quality control as well as up to date technology and operational procedure. At TSP Packaging we continually look for the ways to improve and eliminate defect, striving for the highest quality flexible packaging products.

We have introduced new testing laboratory with full sets of flexible packaging test equipment in 2015 thereby contributing to improve our packaging quality in order to meet the international standards.

## Department - Bag Making

Category ..... Production Process

### Description

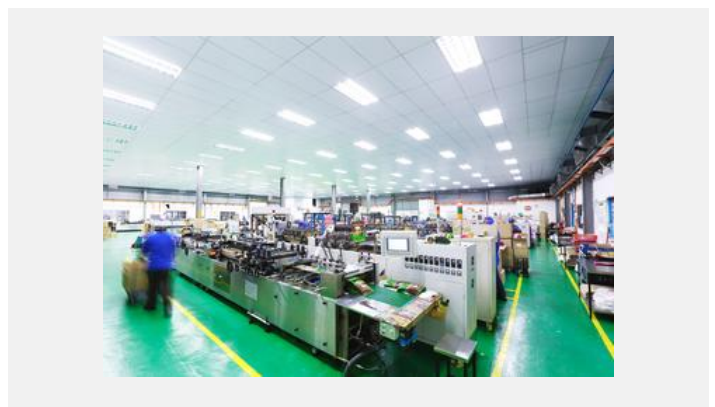

To standardize our production operations, our factory adopted a 24-hours shift system. The whole production line is automated with high efficient machines ensuring our products meet the quality requirements.

Creating a good environment not only helps in producing quality products but also helps in safe guarding the workers well-being.

Our Factory is planned in a professional manner based on modern factory models to achieve high efficiency, practicability, hygiene and safety.

Our Factory can be divided into 7 main departments. These Seven departments are integrated into one complete production process.

Each of the departments is meticulously planned and the staff are well trained. There is full cooperation among of the workers in striving to achieve the best product quality and consistent high productivity.
